**Subject:** Unfair to credit unions

I think that NCUA's bailout of the corporate credit unions is very unfair to the individual credit unions. They should not have to pay for the mismanagement of the Corporate Credit Unions. The Corporate Credit Unions should have been much more tightly regulated on what investments they could be in. I feel as a credit union member that my individual credit union and the shareholders, or members, should not be punished for the poor regulation by NCUA and mismanagement of the Corporate Credit Union system.
