Good Morning All,

Attached you will find my comments regarding the Proposal to Modernize Chartering and Field of Membership (FOM) Manual. I cannot state a more significant and overdue change necessary for credit unions and the American people. The need of modernizing the FOM rules will provide a greater opportunity of choice for the American public and allow credit unions to expand their “people helping people” philosophy. Both of those concepts justify the need to press forward in doing the right thing and make it a Win-Win for all. Thank you!
