Subject: Expansion of Credit Unions Lending Capacity
Date: Friday, August 07, 2015 9:01:58 AM

Have no problem with the expansion of credit union's lending capacity as long as the credit unions are taxed on the same basis of my bank, examined by state/national regulators, and comply with the same regulations. Face it, it is time for credit unions to be taxed.

Interstate Credit Union opened an office across the street from my bank. As long as you have driven on an interstate highway, seen an interstate highway on a paper map, phone app , TV, or heard of someone who has done either one, you can be a member. It is time Congress faces reality and recognize credit unions for what they are.

Each institution earned about \$1,000,000.00 in 2014. I paid \$325,478.00 in taxes-Net \$628,184. Interstate paid \$-0- in taxes-Net \$1,000,000.00.

Interstate is owned by a small private group which receives a significant financial benefit from their tax free status.

Give it to them-but regulate and tax them!!

Thank You,

Lloyd Gunter
