# FEDERAL CREDIT UNION PROGRAM

## 1964 ANNUAL REPORT

BUREAU OF FEDERAL CREDIT UNIONS — WASHINGTON, D.C.

FCU-561

## FOREWORD

The year 1964 marks the Thirtieth Anniversary of the Federal Credit Union Act, signed by President Franklin D. Roosevelt on June 26, 1934.

Surely no one at that time could have foreseen the remarkable growth in Federal credit unions that has taken place in just three decades. By the end of 1964, Federal credit unions were serving more than eight million Americans and their families. Outstanding loans to members totaled \$3.3 billion and members' shares exceeded \$4 billion. In 1964, increases in loans and shares surpassed all previous records. Loans expanded \$438 million, almost one-fourth more than the previous record in 1960, while shares rose \$565 million, 30 percent more than the 1963 record.

But, of course, progress consists of more than financial expansion in a single year, as I hope this Report will make amply clear.

One of the major sources of pride to Federal credit unions, for example, is that the Federal credit union program has been supported for over a decade by the Federal credit unions themselves, without cost to the Federal Government.

Another source of satisfaction is that the basic philosophical foundations of the credit union movement—promotion of thrift and provision of credit to members at reasonable cost, all within the framework of organizations that are member-owned and operated—have been preserved by Federal credit unions.

As the Thirtieth Anniversary of the Federal credit union program is reached, it seems appropriate to broaden the scope of the annual report of the Bureau of Federal Credit Unions to include, with the regular annual statistical summarization of the financial operations of Federal credit unions, a review of the Bureau's activities. It is my hope that this more comprehensive coverage will make the Report for 1964 more useful to Federal credit union officials as well as to others who are interested in all phases of the Federal credit union program.

If the past thirty years is any indication, the future will give rise to major challenges and to important changes. With the experience and the maturity that the years have brought to us, however, I am quite sure that we can move ahead with confidence.

## SECTION I

# FEDERAL CREDIT UNION OPERATIONS, 1934-1964

### Economic Developments

Substantial expansion in Federal credit union operations took place in 1964 in a climate of vigorous domestic economic growth and prosperity.

Economic activity expanded for the fourth successive year, with gains taking place at an even more rapid rate than in 1963. The current period of growth, which began in March 1961, is already one of the longest in our history, and major indicators suggest a continuation of expansion into 1965.

Despite strikes in the automobile industry late in 1964, gross national product increased 6.6 percent, to \$623 billion by yearend, and consumer income after taxes rose to \$431.8 billion.

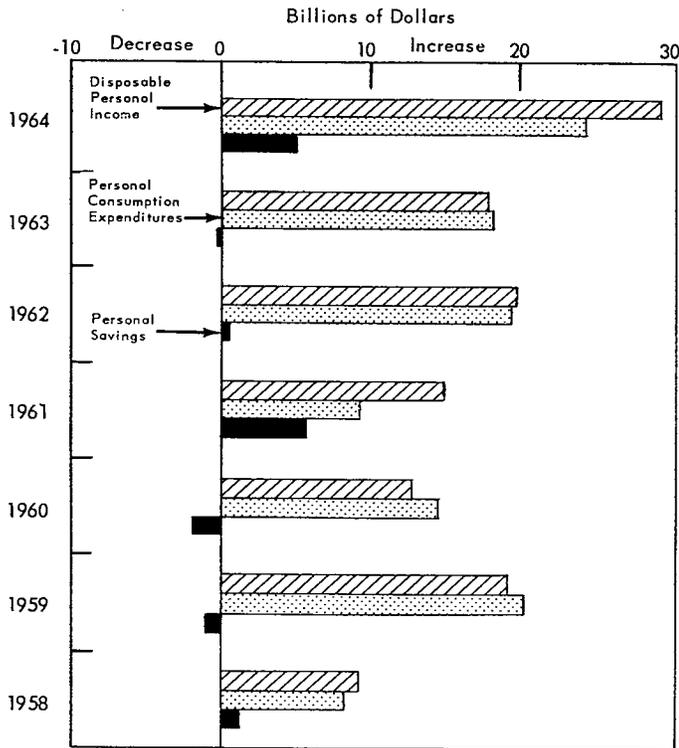

Commodity prices remained fairly stable despite stimulative influences provided by the reduction in Federal income taxes early in the year, and a generally unrestrictive monetary policy. The consumer price index rose moderately, as prices for services continued to increase more rapidly than other prices.

Increases in consumer income after taxes and in personal consumption expenditures were larger in 1964 than in any year of the current cyclical expansion, while the rise in personal savings was the largest since 1961, as Chart 1 shows.

According to data compiled by the Board of Governors of the Federal Reserve System, consumers added \$24 billion to their savings accounts at financial institutions in 1964, considerably more than in 1963. At the same time, they increased their short- and intermediate-term instalment debt at such institutions by \$5 billion, somewhat less than in 1963.

**CHART 1.**

CHANGES IN DISPOSABLE PERSONAL INCOME, CONSUMPTION EXPENDITURES, AND PERSONAL SAVINGS, 1958-64.

Source: Department of Commerce

### Federal Credit Union Activity

Almost all phases of Federal credit union operations grew at a record-breaking pace during 1964.

Members' shares and loans outstanding increased \$565 million and \$438 million, respectively, more than in any previous year in the thirty-year history of the program. At yearend, shares totaled \$4,017 million, and loans, \$3,349 million, as Table 1 shows.

The downward drift in annual rates of increase in members' shares and total assets, which has characterized expansion in these items in recent years, was interrupted in spectacular fashion in 1964. Each of these balance sheet items rose more than 16 percent, the largest percentage increases in any year since 1957. The expansion in loans, at 15 percent, on the other hand, was larger than in 1963, but considerably smaller than the increases, averaging 21 percent, in 1959 and 1960. As a result of the larger growth in shares than in loans in

1964, the percentage of loans to total assets dropped to 73.5, almost a full point below a year earlier.

Consumer saving and borrowing at credit unions tend to reflect national saving and borrowing patterns. The larger expansion in shares than in loans at Federal credit unions in 1964, for example, accompanied a substantial increase, on a national scale, in the flow of personal saving from the preceding year, as Chart 1 shows. In 1961, also, when personal saving increased sharply from the previous year, a similar pattern of share and loan growth took place at Federal credit unions.

The increase in the number of members of Federal credit unions in 1964, at 592 thousand, also set a record, and total membership had passed the 8 million mark by yearend. Membership as a percentage of potential rose from 55.8 percent in 1963 to 57.5 percent in 1964.

The number of operating Federal credit union charters increased 323 to 11,278 in 1964 but the rate of increase continued to drop off.

During 1964, 580 charters were issued and 323 were canceled. Almost three-fifths of the net gain was accounted for by six states—Illinois, New York, Ohio, Pennsylvania, Indiana, and California. Chartering in 1964 and in earlier years is discussed more fully in Section V of this Report.

TABLE 1.—Federal credit union operations, 1964  
[Dollar amounts in millions]

Item	Dec. 31, 1964		Increase during 1964	
	Number or amount	Percentage distribution	Number or amount	Percent
Number of operating Federal credit unions	11,278	----	323	2.9
Number of members	8,092,030	----	592,283	7.9
Total Assets/Liabilities and Capital	4,559	100.0	643	16.4
Loans to members	3,349	73.5	438	15.0
Cash	256	5.6	39	18.1
U.S. Government obligations <sup>1</sup>	100	2.2	12	13.5
Savings and loan shares	740	16.2	141	23.6
Loans to other credit unions	66	1.5	7	11.4
Other assets	47	1.0	6	13.4
Notes payable	79	1.7	10	15.4
Accounts payable and other liabilities	29	.6	8	36.6
Shares	4,017	88.2	565	16.4
Regular reserve	227	5.0	35	18.4

Other reserves <sup>3</sup>	15	.3	3	23.2
Undivided earnings <sup>4</sup>	188	4.1	21	12.9

<sup>1</sup> Includes investments in Federal agency securities—amounting to \$4.9 million—authorized under the 1964 amendments to the Federal Credit Union Act.

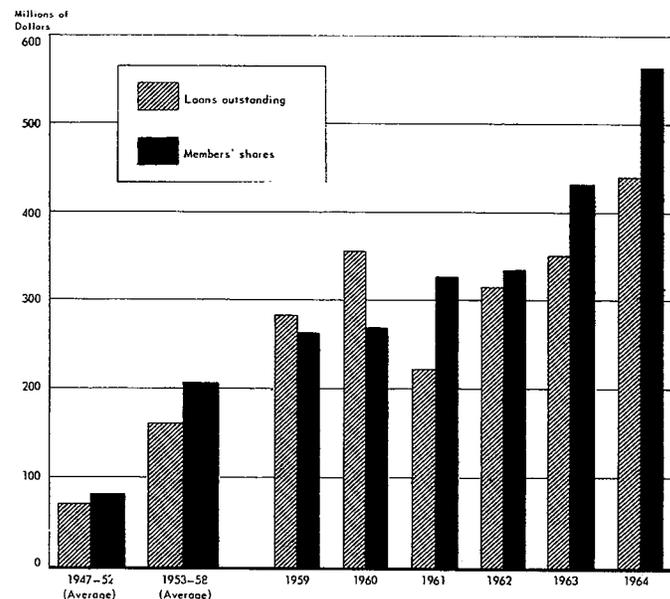

<sup>2</sup> Less than \$500,000.

<sup>3</sup> Reserve for contingencies and special reserve for losses.

<sup>4</sup> Before payment of yearend dividends.

CHART 2.

ANNUAL INCREASES IN LOANS OUTSTANDING AND MEMBERS' SHARES AT FEDERAL CREDIT UNIONS, 1947-64.

### Seasonal Changes in Loans and Shares

On a seasonally adjusted basis, loans at Federal credit unions expanded more rapidly in the first three quarters than in the fourth quarter of 1964. Shares, on the other hand, increased more rapidly in the April-December period following the reduction in Federal income taxes than in the first quarter.

The major component of change in loans and shares at Federal credit unions in recent years has been long-term growth, which has had a tendency to overshadow the relatively small amount of seasonal variation. Nevertheless, distinct seasonal patterns of change take place throughout the year, as may be seen by Chart 3.

Federal credit union loans outstanding typically fluctuate within a range of about \$100 million each year, solely as a result of seasonal influences, as the lower inset on Chart 3 shows. Loans drop each year in January from their seasonal peak in December, and continue to decline at reduced rates in February and March. This first-quarter pattern of Federal credit union loans conforms with changes observable in total consumer short- and intermediate-term instalment debt at this time of the year, during which much of the debt acquired during the preceding Holiday season is repaid.

In the second quarter of each year the volume of loans made typically exceeds the volume of repayments on loans, so that outstandings increase. From mid-year through November there is relatively little seasonal change. In December, outstanding loans rise moderately to their seasonal peak.

Members' shares at Federal credit unions fluctuate within a narrower seasonal range, about \$80 million, than loans, as the upper inset on Chart 3 shows. From the seasonal peak in December and January, shares begin an irregular downward movement in February that continues through August. After no change in September shares show a sharp seasonal increase in the fourth quarter.

As may be seen from Chart 3, the seasonal adjustment procedure considerably smooths the

series for loans and shares, so that short-run changes can be interpreted in terms of the more basic, longer-run influences affecting the data. It should again be emphasized that the dominant factor in changes in Federal credit union shares and loans is the underlying growth in the series which, particularly in the case of shares, almost completely obscures the relatively small seasonal movements.

### Other Financial Developments

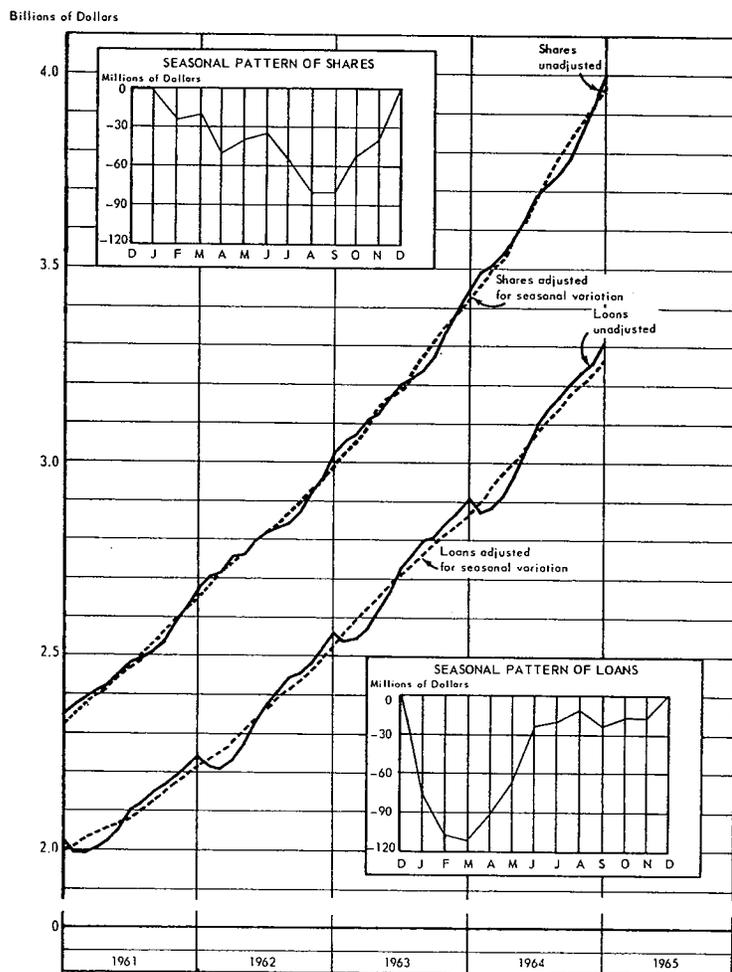

Investments in savings and loan association shares increased \$141 million during the year, a 24 percent expansion from a year earlier. The 1964 increase in savings and loan shares was a record amount for a single year, although this item has shown considerably larger percentage growth in several years during the last decade.

All types of reserves showed considerable expansion in 1964. Relative growth was particularly marked in "other" reserve accounts, as may be seen by Table 1.

*Income and Expenses.* Federal credit union income amounted to \$353 million and expenses to \$136 million in 1964, as Table 2 shows. Net income, at \$217 million, represents an increase of more than 15 percent over 1963. Most of the expansion in income was accounted for by an increase in interest on loans to members, which is the major source of income to credit unions. However, this category accounted for a slightly smaller proportion, and investment income a slightly larger proportion, of total income than in 1963.

CHART 3.

MEMBERS' SHARES AND LOANS OUTSTANDING, UNADJUSTED AND ADJUSTED FOR SEASONAL VARIATION, DECEMBER, 1960-DECEMBER, 1964.

<sup>1</sup> Data for 1964 not adjusted to yearend benchmarks.

Note: Monthly data are based on reports furnished to the Bureau by about 1,350 Federal and State credit unions. For a description of this reporting program, see Section VI, pages 39-41 of this Report. Back figures for the period December 1955-December 1964, are shown in Tables 27-29, pages 88-93, in the Statistical Section.

TABLE 2.—Income and expenses of Federal credit unions, 1964

Income and expenses	Calendar year 1964		Increase during 1964	
	Amount (millions)	Percentage distribution	Amount (millions)	Percent
Total income -----	\$353	100.0	\$46	14.8
Interest on loans -----	315	89.2	39	14.1
Income from investments -----	37	10.3	6	20.6
Other income -----	2	.5	( <sup>1</sup> )	18.0
Total expenses -----	136	100.0	16	13.3
Total salaries -----	58	42.6	6	11.8
Borrowers' protection insurance -----	19	13.7	3	16.8
Life savings insurance -----	12	9.3	2	15.9
League dues -----	4	3.2	( <sup>1</sup> )	9.1
Surety bond premiums -----	1	1.3	( <sup>1</sup> )	7.1
Examination and supervision fees -----	5	3.4	( <sup>1</sup> )	8.1
Interest on borrowed money -----	3	2.5	( <sup>1</sup> )	3.3
Educational expenses -----	3	1.8	( <sup>1</sup> )	18.6
Other expenses -----	30	22.2	4	15.9
Net income -----	217	---	29	15.7

<sup>1</sup> Less than \$500,000.

The largest single expense item, salaries, amounted to \$58 million, and comprised about 43 percent of total expenses during 1964. Three-fifths of the salary expense is incurred by 9 percent of the credit unions with assets of \$1 million or more. Smaller credit unions, in general, rely more heavily on voluntary assistance than do the larger groups.

### Dividends and Interest Refunds

**Dividends.** The proportion of operating Federal credit unions paying a dividend on shares at mid-year, shown in Table 3, edged up from 18.2 percent in 1963 to 19.4 percent in 1964. Since mid-year dividends were first authorized in 1960 under the 1959 amendments to the Federal Credit Union Act, the proportion of credit unions paying them has gradually increased each year.

Yearend dividends were paid by 9 out of 10 Federal credit unions in 1964, and the median rate of return was 4.88 percent, compared with 4.63 percent in 1963. The maximum dividend rate for Federal credit unions is 6 percent.

TABLE 3.—Federal credit unions grouped according to annual rate of dividend, June 30 and Dec. 31, 1964

Annual rate of dividend	Dividend based on shares of—					
	December 31			June 30		
	Number	Percent based on—		Number	Percent based on—	
		Number operating	Number paying		Number operating	Number paying
Number operating Dec. 31	11,278	100.0	----	11,278	100.0	----
Credit unions paying no dividend	1,141	10.1	----	9,085	80.6	----
Credit unions paying dividend, total	10,137	89.9	100.0	2,193	19.4	100.0
Less than 1 percent	0	----	----	0	----	----
1 to 1.9 percent	31	.3	.3	3	( <sup>1</sup> )	.1
2 to 2.9 percent	214	1.9	2.1	41	.4	1.9
3 to 3.9 percent	839	7.4	8.3	88	.8	4.0
4 to 4.9 percent	5,208	46.3	51.4	1,131	10.0	51.6
5 to 5.9 percent	3,186	28.2	31.4	792	7.0	36.1
6 percent	659	5.8	6.5	138	1.2	6.3

<sup>1</sup> Less than 0.05 percent.

**Interest Refunds.** End-of-year refunds of interest to borrowing members were paid in 2,442 (21.7 percent) of the operating Federal credit unions in 1964, as Table 4 shows. Forty-seven percent of the Federal credit unions that refunded interest in 1964 did so at the 10 percent rate, 27 percent returned less than 10 percent of the interest paid by their members in 1964, and 26 percent refunded more than 10 percent. A few Federal credit unions returned as much as 30 percent or more of the interest paid on loans to their members in 1964.

TABLE 4.—Federal credit unions grouped according to rate of interest refund to borrowers, Dec. 31, 1964

Rate of interest refund	Number	Percent based on—	
		Number operating	Number paying
Number operating Dec. 31	11,278	100.0	----
Credit unions paying no interest refund	8,836	78.3	----
Credit unions paying interest refund, total	2,442	21.7	100.0
Less than 5 percent	75	.7	3.0
5-9.9 percent	591	5.2	24.2
10 percent	1,149	10.3	47.1
10.1-14.9 percent	69	.6	2.8
15-19.9 percent	309	2.7	12.7
20-29.9 percent	233	2.1	9.5
30 percent and over	16	.1	.7

### Liquidations.

Of the 323 charters canceled in 1964, 32 resulted from conversion to State charters, 22 Federal credit unions merged with other Federal credit unions, and 10 charters were revoked through failure to commence operations within 12 months of the approval of the charter. The remaining 259 groups completed liquidation and the charters were canceled in 1964.

Some 79 percent of the 4,371 Federal credit unions that completed liquidation during the thirty-year span of operations of the program did so at no loss to the members, as Table 5 shows. In addition to full return of their shareholdings at liquidation, members in some of these Federal credit unions received a liquidating dividend, amounting to more than \$4½ million in the aggregate. Losses to members in the 928 Federal credit unions that paid less than 100 percent of shareholdings at liquidation during the 1934-1964 period totaled \$1.2 million.

TABLE 5.—Liquidations of Federal credit unions, 1934-64

Item	Liquidations completed		
	1934-64	1963	1964
Number of Federal credit unions	4,371	276	259
Paid 100 percent or more	3,443	227	215
Paid less than 100 percent	928	49	44
Number of members	537,748	44,818	47,937
Received 100 percent or more	436,914	38,461	41,434
Received less than 100 percent	100,834	6,357	6,503
Amount of shares	\$68,751,546	\$9,424,909	\$10,818,317
Repaid 100 percent or more <sup>1</sup>	\$62,093,193	\$8,927,670	\$10,157,922
Repaid less than 100 percent <sup>2</sup>	\$6,658,353	\$497,239	\$660,395

<sup>1</sup> In addition, dividends were paid on some of these shares as follows: 1934-64, \$4,507,257; 1963, \$729,430; 1964, \$843,084.

<sup>2</sup> The losses on these shares were as follows: 1934-64, \$1,214,287; 1963, \$110,336; 1964, \$132,792.

The 259 Federal credit unions that completed liquidation in 1964, distributed by size of the members' shareholdings and by number of members, are shown in Table 6.

TABLE 6.—Shares paid out by Federal credit unions completing liquidation during 1964

Classification	Paid less than 100 percent	Paid 100 percent or more	Total	
			Number	Cumulative percentage
Total	44	215	259	---
Amount of shares:				
Less than \$1,000	12	15	27	10.4
\$1,000 - \$4,999	12	49	61	34.0

750-999	—	1	1	96.9
1,000 and over	—	8	8	100.0

For further discussion of this subject, see Section V.

### Reserves.

According to law, Federal credit unions must establish a regular reserve consisting of members' entrance fees, fines, and transfers of 20 percent of net earnings in each dividend period until the regular reserve is equal to 10 percent of members' shareholdings. At that time no further transfers from earnings are required. Special reserve accounts may also be found necessary by the Director of the Bureau.

Share growth has been so rapid over the years that despite supplementation of regular reserves as required by law, the ten percent goal has not yet been reached by Federal credit unions as a group. In 1964, for example, Federal credit unions added \$43 million to their regular reserve accounts (19.8 percent of aggregate net earnings), but by yearend the regular-reserve-to-share ratio was 5.6 percent, only slightly higher than in 1963, as Table 7 shows.

A major factor in the small increase was the relatively large percentage growth in shares compared with that in net earnings in 1964. Another factor tending to retard the growth of regular reserves was loan charge-offs which amounted to about \$11 million in 1964, somewhat more than in 1963.

In general, large Federal credit unions tend to have higher reserve-to-share ratios than small credit unions, although the largest size group—credit unions with assets of \$2 million and over—had a somewhat lower reserve-to-share ratio than the next smaller group. The two largest size groups together accounted for about three-fourths of total assets of all Federal credit unions at the end of 1964.

TABLE 7.—Reserves, net earnings, and shares of Federal credit unions, specified periods, 1947-64

Year and asset size group	Reserves as percent of members' shares		Percent change from preceding year in:			
	Regular reserves	Total reserves	Members' shares	Regular reserve	Total reserves	Net earnings
1947-52 (av.)	3.3	3.5	24.4	24.4	24.9	39.6
1953-58 (av.)	3.7	4.0	20.4	25.3	26.5	25.0
1959	4.4	4.9	14.5	21.1	19.9	16.0

\$2,000 and over	5.6	6.1	28.8	30.5	30.8	29.3

<sup>1</sup> Breakdown by asset size shown below.

### Operating Ratios and Averages.

Selected ratios and averages pertaining to Federal credit union operations in 1964 are shown in Section IX, Tables 19 and 20 for Federal credit unions grouped by State, Tables 21 and 22 for Federal credit unions grouped by type-of-membership, and Table 26 for Federal credit unions grouped by asset size. Similar data are shown in Table 11 of this Section for Federal credit unions grouped by age (year chartered).

Differences in operating ratios appear to be associated more with size of credit union than with any other single variable. The operations of smaller credit unions as a group are characterized by relatively low salary expense compared with other expenses, a relatively high rate of loan delinquency, a low ratio of loans to total assets, a low ratio of reserves to shares, and a low ratio of actual to potential members. It is important to recognize, of course, that the small size groups do not consist of the same credit unions year after year. Newly chartered credit unions typically start out small, with the operating characteristics that accompany smallness, but as time goes on most of them move up the size scale.

*Purpose of Loan.* In 1964 Federal credit unions made \$4.5 billion of new loans to their members for a wide variety of purposes, as shown in Table 8. On the basis of a survey made by the Bureau in 1961 of about one-fourth of all operating Federal credit unions, it can be assumed that about one-third of all loans were made for the purpose of purchasing an automobile. One in every seven dollars was borrowed for the purpose of repaying debts. Homes, home furnishing and other durable goods accounted for more than one-fifth of all new loans. Medical, hospital, dental, and funeral expenses accounted for about 5 percent of the total, and educational expenses for 2 percent.

TABLE 8.—Loans made by operating Federal credit unions, by purpose, 1964

Purpose category	Loans made	
	Amount <sup>1</sup> (millions)	Percent of total
Total .....	\$4,523	100.0
New automobiles .....	778	17.2
Used automobiles .....	620	13.7
Consolidation of debts .....	674	14.9
Homes, home improvements, and maintenance .....	624	13.8
Furniture, household appliances, and other durable goods (boats, house trailers, etc.) .....	344	7.6
Holiday and recreation expenses (vacations, gifts, etc.) .....	231	5.1
Medical, hospital, dental, and funeral expenses .....	217	4.8
Current living expenses .....	145	3.2
Educational expenses .....	86	1.9
All other .....	804	17.8

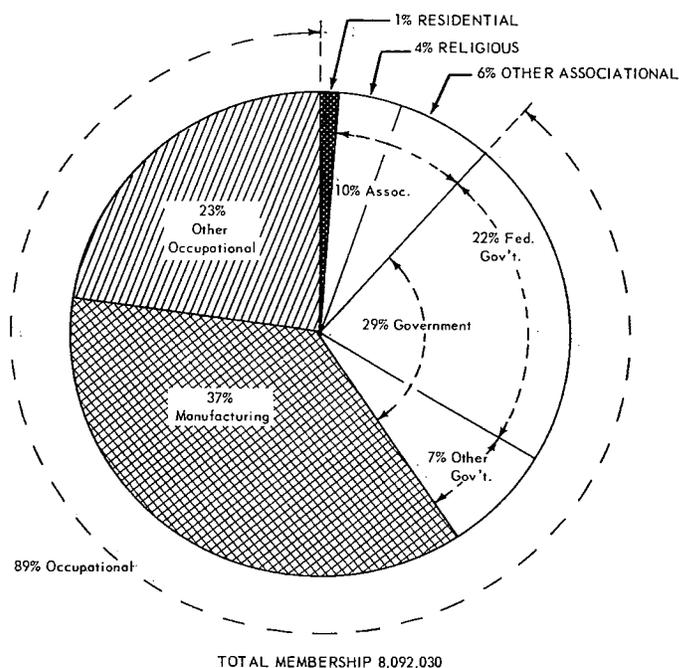

<sup>1</sup> Estimated on basis of 1961 survey.

*Type of Membership.* Occupational groups in private industry and commerce, and in Federal, State, and other government agencies account for the bulk of the Federal credit unions in the United States. In 1964, occupational groups accounted for 83 percent of the number and 89 percent of the membership of all Federal credit unions, as may be seen in Chart 4. Associational groups, comprising 15 percent of the number and 10 percent of the membership in 1964, consist of credit unions in religious organizations (largely parish groups), labor union groups, fraternal and professional organizations, and cooperatives. Federal credit unions in urban and rural communities—residential groups—account for only 2 percent of the number and somewhat more than 1 percent of the membership of all Federal credit unions.

Almost 90 percent of the record 592 thousand increase in membership in 1964 occurred among occupational groups as a whole. Government employee groups accounted for 248

CHART 4.

MEMBERS OF FEDERAL CREDIT UNIONS, DECEMBER 31, 1964.

thousand (42 percent) of the total gain in membership in 1964. Federal Government employee groups recorded an increase of 193 thousand—two-thirds of which occurred among Federal credit unions in military establishments. Federal civilian and military Federal credit unions each recorded a 12-percent increase in membership, in contrast to a national gain of about 8 percent, in 1964. The manufacturing occupations, on the other hand—which made up 37 percent of the total membership—increased only 5.8 percent during the year.

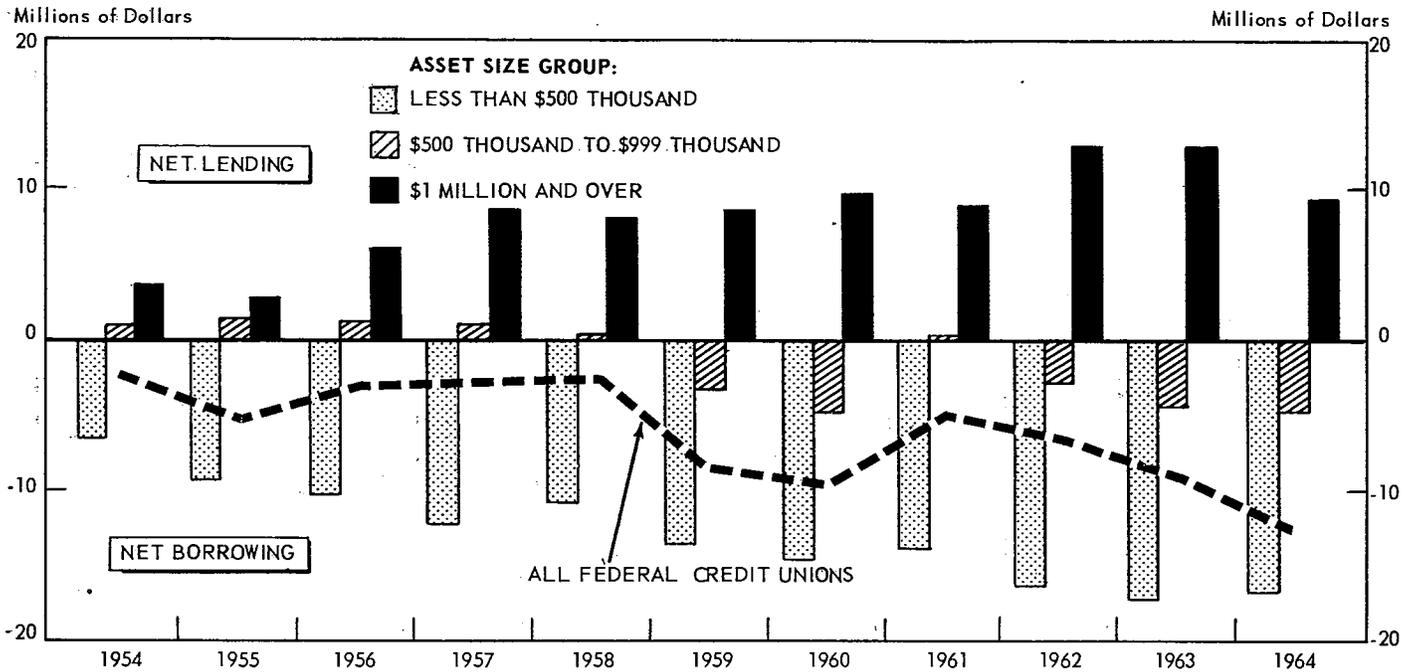

Associational groups recorded a 7.7 percent increase in membership in 1964, and residential groups reported a gain of 9.5 percent.

*Loans to Other Credit Unions and Notes Payable.* Federal credit unions as a group have been net borrowers as of yearend for many years. Their debt has risen somewhat over the years, but remains relatively small, as Chart 5 shows.

As of the end of 1964, loans to other credit unions amounted to \$66.1 million and notes payable to \$78.5 million. The net indebtedness of Federal credit unions as a group, at \$12.4 million, compares with previous highs of \$9.6 million in 1960 and \$8.8 million in 1963. Such debt is, of course, relatively small compared with the volume of liquid assets held by Federal credit unions.

CHART 5.

NET LENDING AND BORROWING BY FEDERAL CREDIT UNIONS, BY SIZE GROUP, 1954-64.

On balance, smaller credit unions are net debtors and larger credit unions are net creditors, as Chart 5 shows.

*Balance Sheet Structure*

There have been important structural changes in the balance sheets of Federal credit unions of different sizes in recent years, as is indicated in Chart 6. Shifts in the distribution of balance sheet items at credit unions of different size over long periods must be interpreted cautiously since balance sheet structure tends to be closely related to the size of credit union which, on the average, has increased over the years. Nonetheless, such shifts are of interest and are enlightening, particularly for short periods of time.

Federal credit unions in all size groups increased their loans to members as a proportion of total assets over the period 1950-64 as a whole, as the top panel of Chart 6 shows. For each size group, the loan-to-asset ratio rose from 1950 to 1960, with the increase most marked at the largest credit unions, then dropped from 1960 to 1964. For the 14 years, the ratio for the largest size group rose more than 13 points, considerably more than for the smaller groups. Since assets held in the form of cash and "other" showed relatively little change over the period, changes in the proportion of loans had their major effect on investments.

The relative importance of the major forms of Federal credit union investments have shown substantial changes over the period, as the center panel of Chart 6 shows.

In the fourteen years since 1950, Federal credit unions of all sizes have substantially increased the proportion of their investments held in the form of savings and loan shares, and decreased their holdings of U.S. Government securities. The relative growth in holdings of savings and loan shares has been particularly marked at credit unions in the \$500 thousand and less asset size group.

The proportion of investments in the form of loans to other credit unions has fluctuated somewhat, but has remained relatively small over the period.

Members' shares comprise about 88 percent of total liabilities, a proportion that has remained relatively stable for several years. The percentage distribution of principal liabilities, which excludes members' shares, in the bottom panel of the chart shows that reserves account for a larger proportion of total "other" liabilities at each of the three size groups at the end of 1964 than they had 14 years earlier. Notes payable have, in general, tended to account for a declining proportion of other liabilities at all sizes of Federal credit unions.

\* \* \* \*

CHART 6.

DISTRIBUTION OF BALANCE SHEET DATA, BY SIZE OF FEDERAL CREDIT UNION, SELECTED YEARS.

Federal Credit Unions  
By Age

Data for operating Federal credit unions grouped by age (year chartered) have previously been published in the Bureau's annual reports at 5-year intervals. Age distributions were last shown in the 1959 issue of the *Report of Operations*, and are again included in this *Report* in Tables 9-12.

Survival rates for Federal credit unions grouped by single years of operation are shown in Table 9; in the other tables, however, the data have been summarized by 5-year age groupings for all except the 50 Federal credit unions chartered in 1934 and still in operation at the end of 1964.

At the end of 1954, 72.6 percent of the Federal credit unions that had been chartered were still in operation; five years later the percentage was 70.4 percent; and at the end of 1964, it was 68.1 percent. As may be seen from Table 1, Section IX, a decline in new charters, accompanied by an increase in cancellations, has resulted in a sharp drop in the net increase in Federal charters during the past decade.

In the five-year period 1950-1954, for example, there were 3,467 new charters issued and 527 charters canceled, resulting in a net increase of 2,940 charters; during the past five years 1960-1964, by contrast, 3,159 new charters were issued and 1,458 were canceled, resulting in a net increase of only 1,701 new Federal charters. To put it another way, the number of new charters issued during 1960-1964 declined 9 percent from the number issued during the five years 1950-1954; cancellations during the same period increased 177 percent, with a resulting decline of 42 percent in net issuances.

Survival rates for Federal credit unions in operation at the end of 1964 exceeded the national rate in all age groupings 11 years or less (Federal credit unions chartered after 1953). The percentage still in operation in the age groupings 1947-1953 was about the same as the national rate, but was considerably smaller for Federal credit unions that were chartered during World War II and the immediate post-war years. Although survival rates among Federal credit unions chartered prior to World War II exceeded such rates for Federal credit unions chartered during the war, they remained below the national rate of 68.1 percent at the end of 1964.

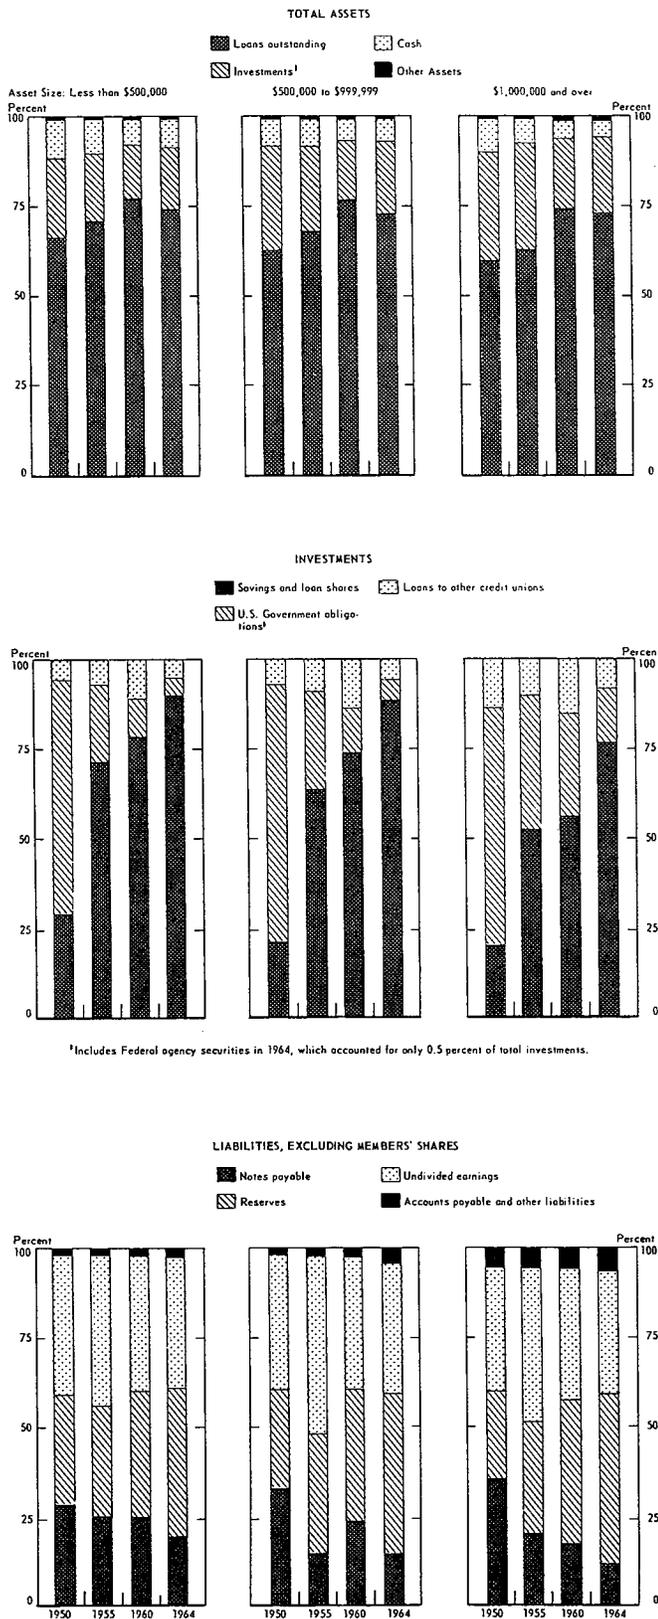

TABLE 9.—Federal credit union charters issued, and number and percent operating, specified reporting periods, 1949-64

30 years	1934	78	50	64.1	---	---	---	---	---	---	---	---	---

Although age apparently has little relationship to the amount of shares held relative to total liabilities and capital, it is a factor in average shares per member. In all except one of the age groups shown in Table 10, for example, shares as a percent of total liabilities and capital are near the national average of 88 percent, and only among the 30-year age group

does the percentage drop below the national average to any appreciable extent. Average shareholdings, however, increase with age, from \$224 in Federal credit unions chartered less than 5 years to more than \$600 in Federal credit unions that have been operating for 25 years or longer, as may be seen in Table 11.

As might be expected, reserves likewise

<sup>2</sup> Reserve for contingencies and special reserve for losses.

<sup>3</sup> Before payment of yearend dividend.

tend to increase with age of the Federal credit union. It takes time to build up reserves out of net income, which is likely to be quite small during the early years of operation. Regular reserves range from 2.4 percent of total liabilities and capital in the youngest groups to 7.1 percent of the total among the oldest Federal credit unions; the average for all Federal credit unions was 5 percent at the end of 1964.

Federal credit unions derive most of their

income from interest on loans to their members. Some credit unions derive a small amount of additional income from investments. The younger, and generally smaller, Federal credit unions usually have relatively little capital in excess of that needed to finance the members' loans. As credit unions grow, however, any excess capital that accumulates is invested in U.S. Government obligations, savings and loan association shares, or in loans to other credit unions.

TABLE 12.—Percentage distribution of income and expenses of Federal credit unions, 1964  
CREDIT UNIONS GROUPED BY YEARS OF OPERATION

Income and expenses	Your credit union	All Federal credit unions	Years of operation and year chartered						
			Less than 5 years (1960-64)	5-9 years (1955-59)	10-14 years (1950-54)	15-19 years (1945-49)	20-24 years (1940-44)	25-29 years (1935-39)	30 years (1934)
Number operating Dec. 31, 1964		11,278	2,812	2,592	2,371	864	732	1,857	50
Total income	100.0	100.0	100.0	100.0	100.0	100.0	100.0	100.0	100.0
Interest on loans		89.2	95.5	93.8	91.3	90.2	86.4	85.6	85.5
Income from investments		10.3	3.9	5.8	8.2	9.5	13.1	13.9	14.0
Other income		.5	.6	.4	.5	.3	.5	.5	.5
Total expense	100.0	100.0	100.0	100.0	100.0	100.0	100.0	100.0	100.0
Total salaries		42.6	39.1	41.2	41.1	43.2	43.0	44.4	45.6
Borrowers' protection insurance		13.7	12.5	12.7	13.5	13.8	14.1	14.3	16.3
Life savings insurance		9.3	10.9	10.5	10.3	8.9	9.0	8.1	6.7
League dues		3.2	3.2	3.6	3.5	2.9	3.3	2.8	2.3
Surety bond premiums		1.3	1.8	1.6	1.3	1.2	1.3	1.3	1.5
Examination and supervision fees		3.4	5.2	4.1	3.2	2.9	3.2	3.2	3.6
Interest on borrowed money		2.5	5.9	4.1	3.1	2.3	1.3	1.1	2.9
Educational expense		1.8	1.6	1.7	1.9	1.9	1.8	1.9	1.2
Other expenses		22.2	19.8	20.5	22.1	22.9	23.0	22.9	19.9

Salaries make up the bulk of the expenses of the Federal credit unions in all age groups shown in Table 12. The smaller credit unions, which make up a large proportion of the credit unions that have been operating less than five years, rely more heavily on voluntary clerical and managerial assistance.

\* \* \* \*

### A Generation of Growth and Change

In its thirty years of existence, the Federal credit union program has survived a major war and has adjusted to a variety of changing economic conditions. In general, Federal credit unions have come through the difficult periods with added strength and vitality, although the program has not been without occasional setbacks and periods of uncertainty.

The purpose of this section is to summarize, in graphic form, some of the major trends and developments at Federal credit unions over the last three decades.

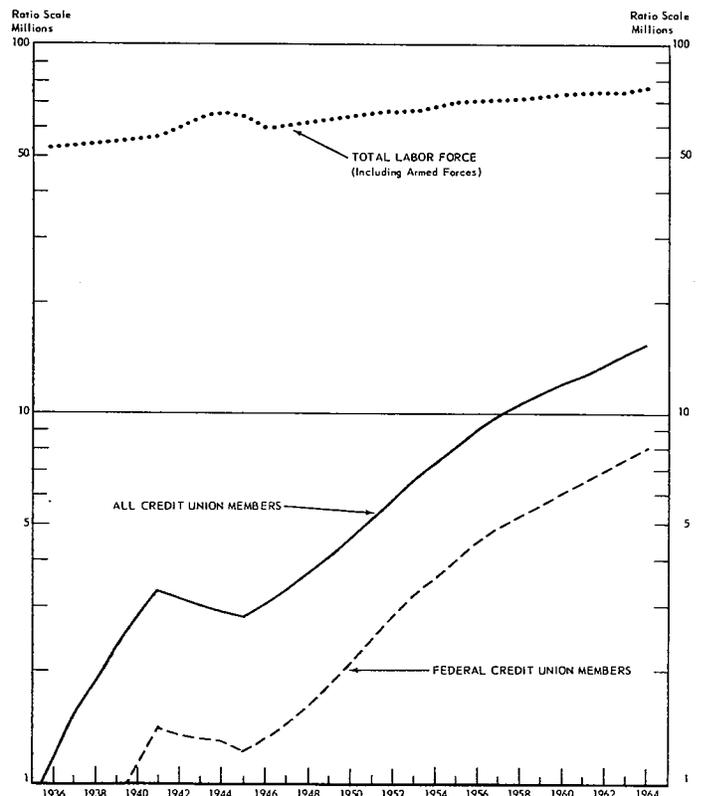

#### Membership

The number of members in Federal credit unions rose rapidly in the late 1930's and reached 1.4 million by the beginning of World War II. Membership declined during the war years, but resumed its rise in the post-war period.

Membership passed the two million mark in 1950. During the decade of the 1950's the number of members in Federal credit unions continued to increase rapidly, and by the end of the decade membership exceeded 5.6 million. Growth in the 1960's has been even more spectacular, with two million members having been added in the last four years.

Credit union membership has risen as a proportion of the total labor force, as Chart 7 shows. At the close of World War II, less than 2 percent of the labor force were members of Federal credit unions. By the end of 1960 this proportion had increased to 8.3 percent. At the end of 1964, 10.5 percent of the labor force were members of Federal credit unions. Inclusion of members of State-chartered credit unions approximately doubles these percentages.

CHART 7.  
CREDIT UNION MEMBERSHIP AND TOTAL LABOR FORCE, 1935-64.

NOTE: Labor force data from Department of Labor.

### Growth in Loans and Members' Shares

Loans outstanding and members' shares, shown on Chart 8, grew rapidly in the pre-World War II years. Shares expanded more rapidly during this period than at any other time. Loans increased at a correspondingly rapid rate in these years as credit unions found a ready demand for credit among their members.

With the coming of the war, loan demand subsided as a result of many factors, including a lack of consumer durable goods, controls on consumer credit, and a rise in disposable personal income. Shares, nevertheless, continued to increase, although at a slower rate than in the pre-war years.

After the end of World War II, loans again began to increase at rates comparable to those before the war, and continued at this pace through the period of the Korean conflict. The rate of expansion in shares picked up from the wartime rate but did not match pre-war expansion.

In general, the 1950's and 1960's have been a period of decreasing rates of increase in both

shares and loans although, as we have noted, growth in dollar terms has continued to expand.

### Federal Credit Unions in the Financial Community

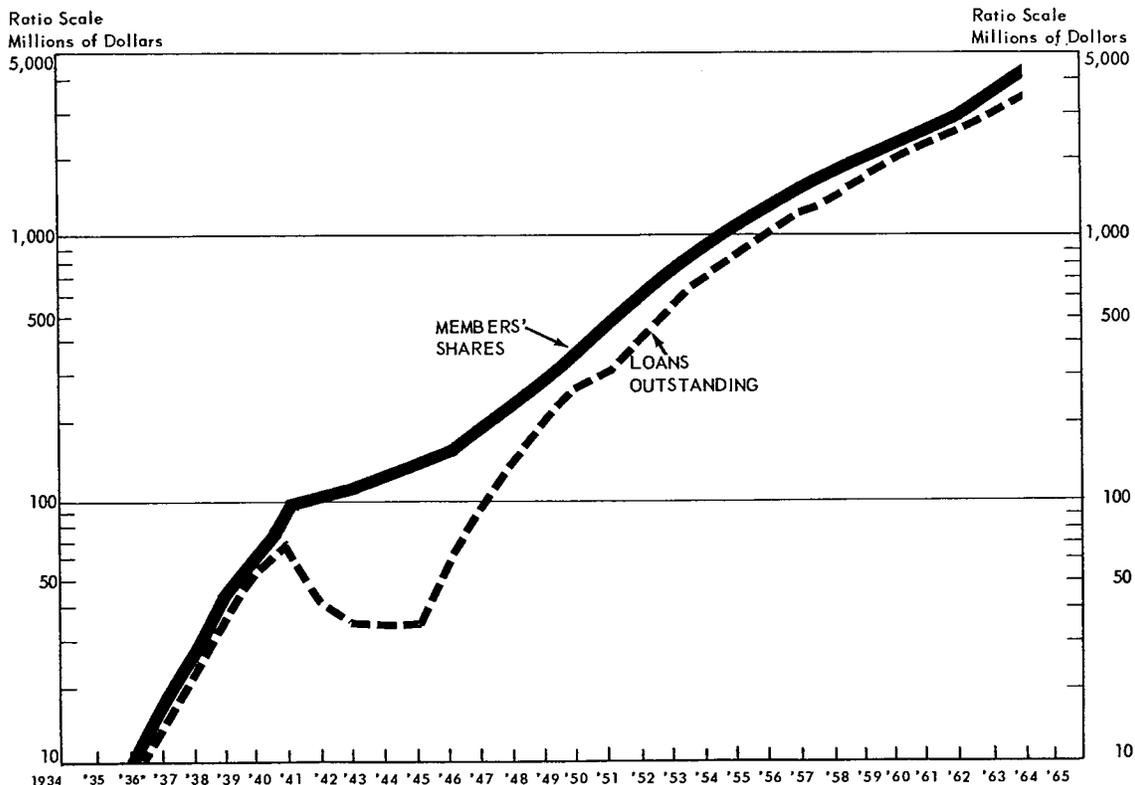

For many years loans and shares at Federal credit unions have increased gradually as a proportion of total short- and intermediate-term consumer instalment credit and consumer savings accounts in savings institutions, but they remain a relatively small part of total debt and saving.

For the ten-year period, 1954-1964, Federal credit union loans outstanding rose at a rate of about 18 percent per year, almost twice that of any other major lender, as Chart 9 shows. Despite this rapid rate of increase, however, Federal credit unions held only 6.4 percent of total short- and intermediate-term consumer instalment credit at financial institutions at the end of 1964.

The volume of loans made by Federal credit unions has also risen more rapidly than that of other lenders as a group, as may be seen in Chart 10.

CHART 8.

MEMBERS' SHARES AND LOANS OUTSTANDING AT FEDERAL CREDIT UNIONS, 1934-64.

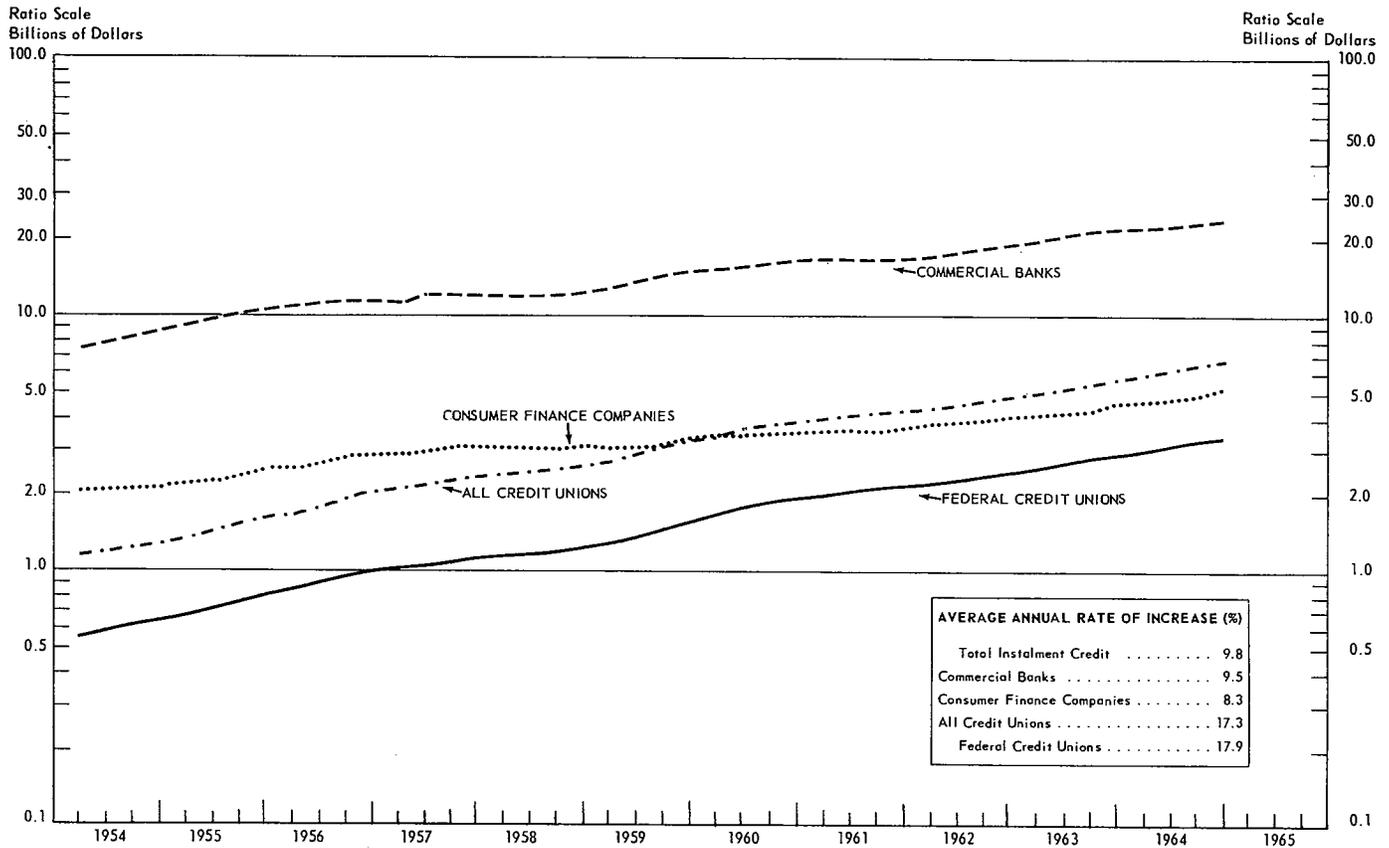

\* Less than \$10 million prior to 1937.

Shares in Federal credit unions have also grown at relatively rapid rates during the last decade compared with the expansion in consumers' savings accounts at other financial institutions, as Chart 11 shows. The 16.3 percent average annual increase at Federal credit unions compares with a rate of 14.5 percent in shares at savings and loan associations. Despite their growth, at the end of 1964 Federal credit union shares made up less than two percent of total consumers' savings accounts.

Rates of growth in total assets at Federal credit unions and savings and loan associations have been quite similar in recent years, and both have exceeded expansion at commercial banks, as Chart 12 shows. Again, however, it should be kept in mind that Federal credit union assets amounted to \$4.6 billion at the end of 1964, compared with \$340 billion for commercial banks and \$119 billion for savings and loan associations.

## SECTION II

### ADMINISTRATION OF PROGRAM

#### Review of Developments in 1964

The Federal Credit Union System moved forward vigorously in 1964. For the first time assets increased more than one-half billion in one year, reaching a level in excess of \$4½ billions. Membership also made good progress and exceeded 8 million at the year's end. The gain in membership during 1964 was 592,000; chartering was at a slightly slower rate than in other post-war years but still averaged about 50 per month.

Significant developments in 1964 include the new emphasis on emergency preparedness for Federal credit unions and provision for underground storage of essential records. The Bureau inaugurated a Thrift Honor Award program to recognize Federal credit unions that do an outstanding job in promotion of saving by their members.

In line with the administration's emphasis on increased productivity and economy in Government operations, the Bureau achieved marked progress in reduction of examination time. The increased productivity was measured in terms of average time devoted to examination of Federal credit unions in various asset-size groups.

The reduction in time was achieved while maintaining quality in procedures. In recognition of Bureau success in this area, the Director of the Bureau was honored with a Presidential Citation.

#### Increased Productivity of Examiners

The increase in productivity achieved as mentioned above resulted in monetary savings of \$271,778. Of this saving, \$186,096 accrued to Federal credit unions in reduced examination fees, and \$85,682 to the Bureau in the form of higher average fees per day (see chart). A reduction in examination time for a given size

group results in a lower total fee, but a higher fee per day.

The saving in examination time for 1964 as compared with 1963 (based on average time by size groups) was 3,877 man-days, or 8.24 percent. This is documented in detail by the work distribution reports submitted by Bureau examiners and summarized in the accompanying chart. This increased productivity was accomplished by improvements made in the Bureau's examination program, improved examiner performance resulting from an aggressive and improved training program, and better operated Federal credit unions.

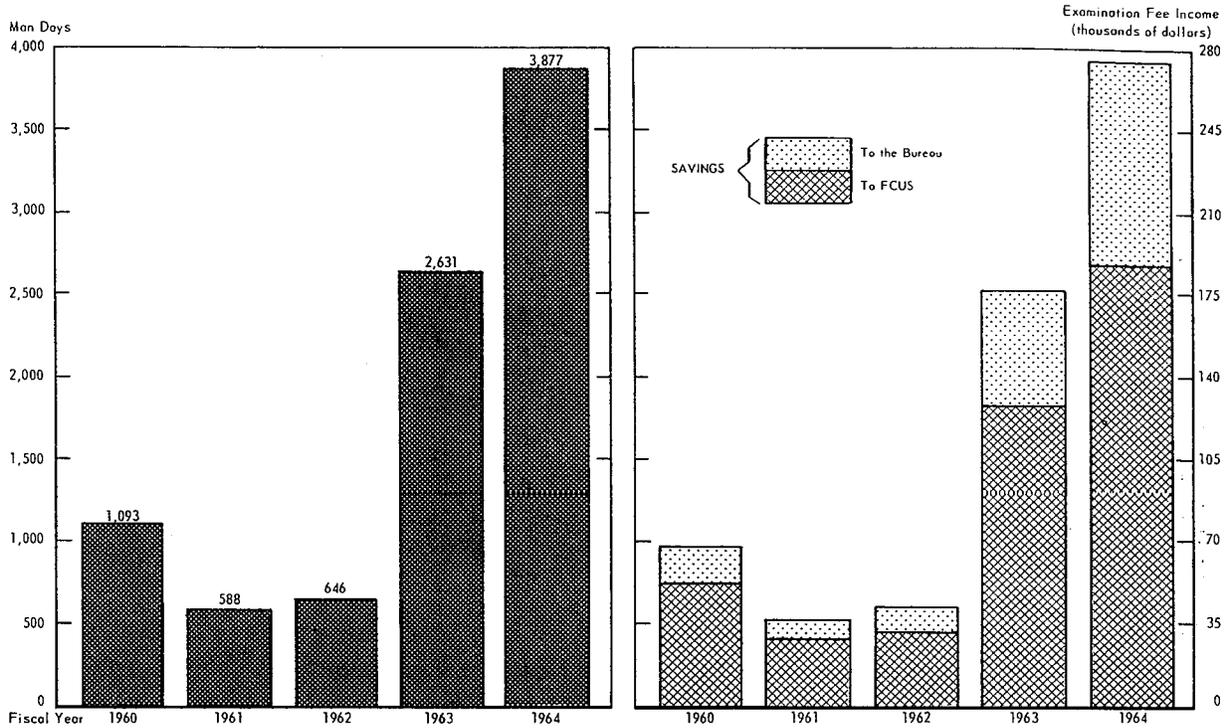

Changes in the Bureau's examination program resulted from a study made by a special committee appointed to study ways and means of improving the examination program. The changes in examination procedures and techniques which resulted from the committee's evaluation work placed considerably greater emphasis on analysis of the credit union's overall operations including an analysis in depth of the FCU's financial condition and internal controls.

A part of the revised supervisory examination procedures was placed in effect in February 1963, while the remaining procedures became operative in 1964.

These changes have contributed materially to the increase in productivity of examiners described above and have also had a very favorable effect on improving credit union management.

The Bureau's emphasis on thorough training of its examiners has played an important part in overall efficiency and in the significant increase in productivity. Better manpower utilization is the result of many factors including careful recruitment of examiners by the Bureau's regional representatives, basic training that increasingly challenges and provides

**ANNUAL INCREASE IN PRODUCTIVITY OF EXAMINERS, 1960-1964**  
(Based on Regular Fee Examinations Only)

satisfaction for new examiners, periodic regional training sessions for all examiners, and a career development program to provide individual training to meet to meet employees' needs.

Although the training of examiners is intensive and comprehensive, it results in only a limited amount of unproductive time since much of it is on-the-job training. This becomes very important in a self-financing program such as that of the Bureau of Federal Credit Unions. The Bureau's interest in its employees, shown through the training program, has played an important part in building good morale and in outstanding examination effectiveness. This was demonstrated during 1964.

The quality of Federal credit union management has improved markedly in recent years as a result of increased attention and effort on the part of Federal credit union officials. The rate of loan delinquency has dropped from 5.1% in 1958 to 3.1% at the end of 1964; and reserves have been strengthened from 4.7% (reserves to shares) to 6.1% at the end of 1964. The improvement in supervisory committee functions in individual Federal credit unions has had a notable effect in improving

credit union operations. The cumulative effect of improved supervisory committee operations has contributed materially during the last two years to better operated Federal credit unions and, consequently, a saving in time needed for making examinations.

**Highlights in the History of Administration.**

As is well known by those who have followed the progress of the Federal credit union program, it was first administered as a Section in the Farm Credit Administration. The program remained under Farm Credit Administration direction from 1934 to 1942 when it was transferred by Executive Order to the Federal Deposit Insurance Corporation. While at FCA, the program grew rapidly in terms of new charters and membership. In the early years much emphasis was given to helping groups obtain Federal credit union charters and a staff of field representatives gave assistance to the new credit unions in developing strong membership education programs and keeping adequate records.

By the end of 1941, there were 4,228 operating Federal credit unions with 1,408,880 members. Their assets totaled \$106 million.

Effective May 16, 1942, the program was transferred to the Federal Deposit Insurance Corporation by Executive Order. This was during the war period and the impact of war-time controls and operations affected Federal credit unions in several ways. Population shifts tended to reduce credit union membership and credit controls reduced opportunities for lending. The sharp reduction in availability of durable consumer goods curtailed need for such financing.

During 1942 to 1945 the number of Federal credit unions and their membership tended to decline. Many Federal credit unions that were not yet well established found it necessary to liquidate. Assets and savings (shares) held up well and increased slightly from year to year. After the war was ended the Federal credit union program took on new energy again and made a strong contribution to the economy of working people during the years that followed.

In 1948, Congress recognized the status of the Federal credit union program by establishing it as a Bureau in the Federal Security Agency (predecessor to the Department of Health, Education, and Welfare.) The Bureau of Federal Credit Unions was placed in the Social Security Administration and began its operation as a Bureau on July 29, 1948.

At the end of 1948 the program consisted of 4,058 Federal credit unions with a membership of 1,628,339. Their assets amounted to \$258,411,736. Accordingly, at the end of 14 years the program was still relatively small with only one-fourth of a billion in assets.

Since the Bureau was established sixteen years ago, the growth of the Federal Credit Union System has been rather remarkable. Assets now exceed \$4½ billion, about 17 times the amount of resources it had after 14 years of the program had elapsed. In fact the growth in 1964 alone was equal to twice the total assets in 1948.

The credit union program (Federal and State) is still relatively small in the total economy, however. It now accounts for 3.3 percent of total consumer savings at financial institutions and 12.3 percent of short and intermediate-term consumer installment loans at such institutions.

The future looks bright for Federal credit unions. There still is a great need for thrift and loan service for persons of small and moderate means. Federal credit unions are especially well equipped to render this service.

## Staff Development Program

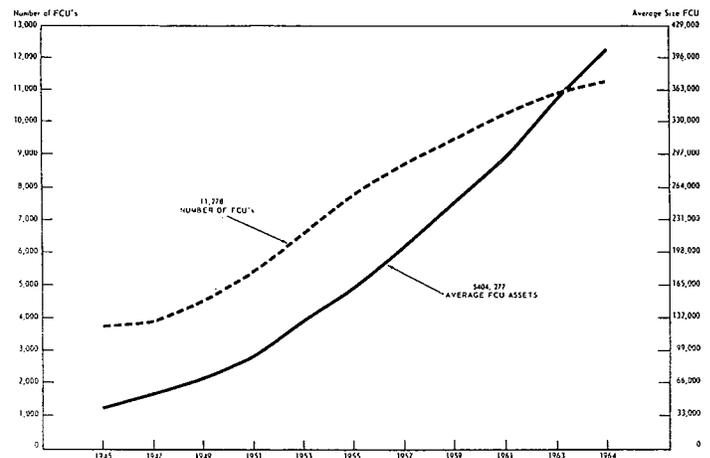

A formal Staff or Career Development Program has been established which includes each Bureau employee, regardless of position, during his entire career with the Bureau. The program is designed to help each employee improve his skills for maximum benefit to Federal credit unions. Personal development plans are "engineered" to meet individual needs. The primary objective is to help each employee develop skills and abilities to the fullest extent.

The Bureau is proud of its staff development program and is constantly alert to improve the program thereby upgrading the abilities and skills of the staff. The need for training programs and staff development is perhaps more important today than ever before.

In the early days of the Federal credit union program the average size Federal credit union was small. Books and records were kept by hand and the average size loan was small.

However, in recent years the Federal credit union program has achieved great growth, which has resulted in the average size Federal credit union increasing from \$40,751 in 1945 to \$404,277 in 1964. The number of Federal credit unions has increased from 3,757 in 1945 to 11,278 in 1964. These changes are shown in the accompanying chart.

INCREASE IN NUMBER AND AVERAGE ASSET SIZE OF FEDERAL CREDIT UNIONS

This growth and development has created other changes which has brought a need to sharpen the abilities and skills of Bureau staff. A large variety of bookkeeping machines are now designed exclusively for credit union needs. In the "average" Federal credit union, machine bookkeeping is now the rule rather than the exception. Also, in recent years elec-

tronic computer systems have been introduced in more and more large Federal credit unions. These and other credit union developments stemming from unprecedented growth brings increased responsibility to Bureau staff.

The Bureau has met these challenges by constantly improving its staff development program. The building of a good staff begins with employee selection. The Bureau has an active recruiting program to hire professional accountants who have indicated that they have an interest in the credit union program.

Training starts when an employee reports for duty. It progresses systematically with the development of the employee. After basic orientation, where each employee learns about the purposes and objectives of credit unions, on-the-job training takes place. Each examiner also participates in special training sessions in Washington.

The training sessions are designed to broaden the horizon of the examiner. The subject matter for examiner training sessions includes financial analysis, conference leadership, analytical thinking, automatic data processing methods and procedures, report writing, etc. Instruction in such subjects is provided by Bu-

reau staff and highly qualified training consultants.

In addition to group training provided by the Bureau, many employees are enrolled in various university sponsored classroom courses, correspondence courses, and the Bureau administered correspondence course in the fundamentals of good writing.

The Management Development Program is part of the Career Development Program. It was set up to help provide intelligent, dedicated, and experienced managers for Bureau positions. At the present time 24 management trainees are in the process of sharpening their management skills, proving that they are or are not worthy of advancement as the opportunities arise.

The Career Development Program is orientated to building a staff in the Bureau of people knowledgeable in sound, progressive credit union concepts. The Bureau's staff is interested in giving the advice and guidance that will help Federal credit union officials reach their goals of stimulating systematic savings among Federal credit union members and providing them with credit at a reasonable cost for provident or productive purposes.

. . . .

## SECTION III

### LEGISLATIVE DEVELOPMENTS

#### Review of Developments in 1964

Following the major revision of the Federal Credit Union Act in 1959, the Bureau of Federal Credit Unions from time to time received requests from the officials of Federal credit unions for amendments which would allow greater flexibility in operation and especially for some expansion of the investment powers, a permissive enlargement of the supervisory committee, authorization of interest refunds at the close of any dividend period and the recognition of the insurance obtained under Title I of the National Housing Act as adequate security for loans.

Upon the recommendation of the Bureau of Federal Credit Unions, the Department of Health, Education, and Welfare, with concurrence of the Administration, presented these proposals to the Congress and following such request H.R. 8459 was introduced in the House by Mr. Patman and S. 2161 was introduced in the Senate by Senator Sparkman. Subsequently Mr. Taft introduced an identical bill, H.R. 8728, and Mr. Multer introduced H.R. 8979 in order to make section 1014 of title 18 of the U.S. Code applicable to Federal credit unions. During consideration of H.R. 8459 by the House, Mr. Multer offered an amendment which incorporated his bill, H.R. 8979, as a part of H.R. 8459.

It is gratifying to note that this legislation was on the Consent Calendar of both the House and the Senate. H.R. 8459 as passed was signed by the President July 2, 1964 and was designated as P.L. 88-353.

Public Law 88-353 amended the Federal Credit Union Act as follows:

*Sec. 8* Added (E) and now permits additional investment in obligations issued by banks for cooperatives, Federal land banks,

Federal intermediate credit banks, Federal home loan banks, the Federal Home Loan Bank Board, or any corporation designated in section 101 of the Government Corporation Control Act as a wholly-owned Government corporation.

(At the present time Federal National Mortgage Association and Tennessee Valley Authority are the only Government corporations with securities outstanding.)

*Sec. 12* Permits the selection of a supervisory committee of not more than five nor less than three members in order to accommodate the greater demands in the larger Federal credit unions.

*Sec. 14* Permits the board to authorize an interest refund to members for any dividend period rather than only on December 31 in accordance with rules and regulations as issued by the Director.

*Sec. 15* Permits the credit committee to accept the insurance obtained under Title I of the National Housing Act as "adequate security" for loans which qualify under Title I.

#### *Title 18 U.S. Code*

*Sec. 1014* Amended the criminal code so that "whoever knowingly makes a false statement or report, or willfully overvalues any land, property, or security, for the purpose of influencing in any way the action of . . . a Federal credit union, upon any application, advance, discount, purchase, purchase agreement, repurchase agreement, commitment, or loan, or any change or extension of any of the same, by renewal, deferment of action or otherwise, or the acceptance, release, or substitution of security therefor, shall be fined not more than \$5,000 or imprisoned not more than two years, or both."

## LEGAL INTERPRETATIONS

From time to time court decisions are made which have a direct impact on Federal credit unions. In addition, in the administration of the Federal Credit Union Act it is necessary for the Director to make important administrative and policy decisions which are equally important to Federal credit unions.

As an added feature of the Annual Report, commencing with this issue, and as an aid to Federal credit unions, the Bureau plans to publish summary information on selected court decisions and policy determinations. While it is not practicable to publish the full text of such determinations, we have in this section set forth the substance of an important court decision and several legal interpretations regarding questions pertaining to the rights and functions of Federal credit unions made during 1964.

<i>Date</i>	<i>Subject</i>	<i>Comments and/or Decision</i>
January 1964	Sales and Use Taxes	In an historic decision affirming the constitutionality of the Federal Credit Union Act and the status of Federal credit unions as instrumentalities of the United States, the Baltimore County Circuit Court has held that FCU's are exempt from Maryland sales taxes. The case, in which the Department of Justice intervened on behalf of the United States as amicus curiae, was decided in June 1964 and is the first judicial determination on these issues. It was heard on appeal by an FCU from a final ruling of the State taxing authority requiring payment of the taxes. It was not appealed by the State.
January 1964	Access to FCU Records by Investigators for State Welfare Department	In an FCU in the Southwest a question was raised regarding the legality of disclosing information about an FCU member to a State Welfare Department, under Article XIX, Sec. 2 of the bylaws. It was decided that an FCU would be required to furnish information about a member's financial status if the State law gives the Welfare Department the express authority or power to subpoena documents for the express purpose for which it has requested them. If the State Welfare Department does not possess this very specific authority, it can only obtain the records of FCU members as an incident to a court proceeding, pursuant to a subpoena issued by the court. The purpose of the subpoena must be specific and not just a "fishing expedition."
January 1964	Establishment of Collection Agency	Several questions were raised regarding the operation of a collection agency by an FCU. Findings in the case reviewed indicated that it was not intended to create a separate legal entity under State law for this purpose, but merely to create an illusion of such for the deception of delinquent members whose loans have proved hard to collect. The establishment of a "phantom" collection agency within an FCU would not be in keeping with the concept of an FCU and therefore not within the incidental powers of an FCU.
February 1964	Pennsylvania Uniform Gifts to Minors Act	It was decided that since shares in FCU's come within the definition of registered securities in the Pennsylvania Uniform Gifts to Minors Act, credit union members may make gifts of shares to minors under the Act. It was pointed out that the fact that FCU's do not qualify as banks under the UGMA is not controlling.

<i>Date</i>	<i>Subject</i>	<i>Comments and/or Decision</i>
February 1964	Prepayment of Dues to a Credit Union League	<p>An FCU advanced several thousand dollars to a League as prepaid dues. There were numerous indications that the advance of funds as requested by the League was equivalent to a loan.</p> <p>FCU's can make loans only to their members, according to Section 8 (5) of the Federal Credit Union Act. FCU's can make investments prescribed in Section 8 (7) of the Federal Credit Union Act and can make no other investment. Therefore, a loan to a League is neither a loan to a member nor an authorized investment and therefore is illegal.</p>
March 1964	Availability of Defense of Usury to Non-member Co-maker Minnesota.	<p>It was determined that the decision of the Minnesota Supreme Court allowing defense of usury to non-member co-maker in a State credit union does not warrant BFCU requiring any change of practice of FCU's in accepting security furnished by their member borrowers in the form of non-member accommodation co-makers.</p>
March 1964	Payment of Utility Bills	<p>One FCU arranged with utility companies to handle the collection of their bills. It entered into a separate contract for this purpose with each company involved. Under this arrangement the FCU would become the agent of utility companies and receive a fee for collecting bills. BFCU decision held that such an activity is not incidental to the purpose of an FCU, and therefore such an arrangement is illegal.</p>
April 1964	Family Group Life Insurance Plan	<p>BFCU reached a decision that involvement of an FCU in the personal insurance affairs of its members and the business processes of insurance companies is not within the incidental powers of an FCU. CU-13 dated 6-16-64, which was released to all FCU's, was based on this decision.</p>
May 1964	Proposal of a Bank to Provide Unicheck Accounts to Members of Co-operating Credit Unions	<p>A bank proposed to FCU's a special package program of banking services to both FCU's and their members. It includes the utilization of the bank by the FCU for its commercial account, and the opportunity to the bank to sell to the members, with the institutional participation of the FCU, a low cost checking account service available only to members of an FCU which accepts the package.</p> <p>Little or no difference could be seen between using FCU's membership as a cooperative purchasing group to buy insurance and using the group to sell them banking services. Therefore, FCU participation in selling such a service to members would be outside the incidental powers of an FCU. This decision is consistent with policies outlined in BFCU release CU-13.</p>
June 1964	Liquidation—Stabilization Fund Claims	<p>Certain State credit union leagues have established Stabilization Funds for the purpose, among other things, of enabling credit unions in liquidation to pay the members up to 100% of their shareholdings. In some cases assistance has taken the form of a donation of money. In others the fund will purchase the remaining assets of the credit</p>

*Date*

*Subject*

*Comments and/or Decision*

union at a price sufficient to pay off the shareholders at 100 cents on the dollar. Problems have arisen with respect to those members who do not file claim for their share balances prior to final distribution. Under normal circumstances these balances would be transmitted to BFCU for deposit in the Federal Treasury for the account of the individuals concerned, or they might escheat to the State.

Trustees of the Stabilization Funds have indicated desire that the contributions not be subject to handling in this way, and would limit the availability thereof to the members who have filed claims.

In the case where a *donation* is made by the Stabilization Fund it has been decided that liquidating FCU's can enter into an agreement with the Fund to the effect that the donated money be used only on behalf of those members who file claims prior to final distribution. However, where the Fund *purchases* the assets of liquidating FCU's each member is entitled to a pro-rata share regardless of whether or not he filed claim before final distribution.

Frequently  
Than Annually

A credit union league requested an interpretation of the last sentence Section 8 (5) of the Federal Credit Union Act which reads as follows:

“ . . . . Loans shall be paid or amortized in accordance with rules and regulations prescribed by the Director after taking into account the needs or conditions of the borrowers, the amounts and duration of the loans, the interest of the members and the credit unions, and such other factors as the Director deems relevant, but such rules and regulations shall not require payment more frequently than annually;”  
The question was whether this provision forbids credit unions to require monthly payments in the terms of their loan notes.

The limitation in the last clause of the sentence is with respect to the rule making power of the Director of the Bureau of Federal Credit Unions, and does not preclude the credit union from requiring payments more frequently than annually.

October  
1964

Effect of 60 Day  
Notice of Share  
Withdrawal and  
Decision of the  
Board of Direc-  
tors to Propose  
Liquidation after  
Expiration of  
Notice Period

The Director has taken the position that after an FCU has formally decided to go into voluntary liquidation, written notice of intention to withdraw shares should not be honored regardless of when notice was given.

<b>Membership</b> -----	Persons and organizations.				Shares in joint tenancy.							
<b>Bonding</b> -----	Board of directors fixes amount of surety bonds.				"Sufficient" surety; payment of premiums by credit unions authorized.				Authority of Director specified.			
<b>Passbook</b> -----	Audit required.				"Passbook" defined.							
<b>Supervisory committee.</b>	Elected by members.									To be appointed by Board of Directors.		Permits enlargement of the supervisory Committee.
<b>Credit committee.</b>	Meetings at least once a month on notice from treasurer.				Notice from treasurer not required.					Committee authorized to appoint loan officer.		

Liquidation	General authority of Governor in involuntary liquidations expressed generally.	Involuntary liquidation procedure detailed.
Taxation	Exempted from all tax Federal credit unions as it does domestic banking corporations.	
Other:		
Space in Federal buildings.	Office space for employee credit unions may be provided free.	Free space permitted if 95% of members are employees.
Conversions.		Authorized to convert from Federal charter to State and vice versa.
Oaths		Bureau officials may administer oaths.
Services		Authorization to sell and cash negotiable checks and money orders for fee, under Bureau regulations.
Annual Meeting.		Permits Annual Meeting in January, February or March.
General Manager.		Deletes "Treasurer shall be General Manager."
Interest Refund		Permits interest refund-any dividend period.

<sup>1</sup> P. L. 86-354 amended several provisions of the Federal Credit Union Act and rewrote the entire act in doing so. The law also included a provision calling for a report by the Bureau Director on the desirability of federally chartered central credit unions to be submitted by Apr. 15, 1960.

<sup>2</sup> This provision is an amendment to the District of Columbia Credit Union Act and not the Federal law.

## SECTION IV

# EXAMINATION OF FEDERAL CREDIT UNIONS

### Review of Developments in 1964

During 1964, nearly 11,000 regular supervisory examinations were made of Federal credit unions. The Bureau of Federal Credit Unions supervises and examines more financial institutions than any other Federal or State supervisory agency. The Division of Examination and Accounting carries on a continuous review and evaluation of the Bureau's examination techniques and procedures. It is the Bureau's objective in making its supervisory examinations to be of maximum assistance to the Federal credit union officials as they in turn encourage the members to develop sound thrift habits and to use their credit wisely.

Since Federal credit unions vary in size, field of membership served, and type of operation, supervisory examination procedures must be flexible. Each examiner adapts the procedures to the conditions he finds in each credit union.

The purposes of a regular supervisory examination are:

- 1) To determine the solvency of the credit union and strengthen its financial condition.
- 2) To determine the extent of compliance with applicable laws, regulations, and sound credit union operations.
- 3) To assist the credit union management in strengthening operations.

The Bureau's supervisory examination is not an audit. The supervisory examinations place greater emphasis on analysis, especially in the area of internal controls and financial condition including lending practices. The examiners' analyses are designed to determine that the credit union is providing maximum service with minimum risk to the members' shareholdings. Since emphasis is on analysis and not on auditing, fewer test checks are now being made in the supervisory examinations.

Obtaining needed information during supervisory examinations naturally entails some fact finding steps or test checks. Responsibility for the audit function in each Federal credit union rests with its supervisory committee.

A new type of supervisory examination report cover and format were placed in use at the beginning of 1964. This changed the appearance and arrangement of the supervisory examination report for the first time in many years.

All types of organizations are making numerous changes and advancements in their accounting systems, particularly in the advanced data processing area. Federal credit unions are among those experiencing these changes. Because of this, the Bureau's supervisory examination procedures have been tailored to meet these changes. Conferences and training sessions were held during the year to acquaint the Bureau's supervisory and examining staff with these advancements and with the needed changes in the supervisory examination procedures to insure that top-notch supervisory examinations will continue to be made in all Federal credit unions.

During the year, the Bureau continued to place emphasis on the work of the supervisory committees. In addition to the joint conference with all of the officials at the conclusion of each examination, a special session with the members of the supervisory committee to discuss their work is arranged by the examiner during each examination. The Bureau has also developed a special training session program for supervisory committee members. During 1964, nearly 60 of these special training sessions conducted by Bureau staff were held in various parts of the country, usually in the evening or on Saturday. A total of approximately 2,000 credit union officials, most of whom were supervisory committee members, attended these sessions. Credit union officials wanting such

a training session, for the committee members in their area, should contact the Bureau's regional office.

#### *Federal Credit Union Accounting*

It has been the objective of the Bureau to develop as far as practicable standard accounting forms for use by Federal credit unions. This results in greater uniformity in operations and more uniform and comparable statistics from year to year.

A number of manufacturers of mechanical accounting machines have developed, and the Bureau has approved, standard accounting forms for use on such machines. A listing of these manufacturers is:

Burroughs Corporation  
International Business Machines Corporation  
Monroe Calculating Machine Company  
National Cash Register Company  
Olivetti Underwood Corporation  
Victor Comptometer Corporation

Federal credit union interest has been increasing recently in the area of advanced data processing accounting systems. Some have made arrangements to utilize the computer operations of their parent organizations, others have contracted with either local or national data processing service centers, and a few have installed their own data processing accounting system.

To assist Federal credit unions interested in data processing accounting systems, the Bureau issued in July 1964 a pamphlet entitled "Guidelines for Use of Advanced Data Processing Procedures by Federal Credit Unions." Copies of the "Guidelines" pamphlet may be obtained from the Bureau's regional offices.

A number of local data processing service centers in various parts of the country have developed standard accounting systems and contemplate making such systems available to credit unions in their locality. Several data processing service centers serving more widespread areas have likewise developed standard accounting systems. The Bureau has approved several of these systems. Information can be obtained from the Bureau's regional offices as to whether approval has been given to a specific system.

Work was started in the latter part of 1964 to revise the Accounting Manual for Federal Credit Unions and to combine the Supplement with the Manual. The Supplement was originally developed for the assistance of the larger

Federal credit unions. Copies of the revised Accounting Manual will soon be released to all Federal credit unions.

As stated elsewhere, several amendments to the Federal Credit Union Act were passed in 1964. One of these amendments expanded the investment powers to permit Federal credit unions to invest in so-called "agency" securities. A new Asset account entitled "Federal Agency Securities," Number 118, was established to record such investments in the credit union's accounting records. An explanation of the new account was given in the Bureau's October 1964 *Bulletin*.

Another amendment permitted FHA Title I insurance to be accepted as adequate security for home modernization and improvement loans. A discussion of such loans and insurance and the proper accounting treatment for them was given in the January 1965 issue of the *Bulletin*.

#### **Three Decades of Progress in Examination Procedures and Techniques**

The first examinations of Federal credit unions were made in 1936. Initially, one group of field employees, known as "Investigators" and later as "Field Representatives," was assigned the responsibility for supervising Federal credit unions and another independent group, known as "Examiners," was responsible for the examination function. The Examiners carried out their examinations quite generally without personally discussing their findings with the credit union officials. If conditions were such that a personal discussion was needed, the Field Representative, after he had received a copy of the examination report, would meet with the officials and discuss the Examiner's Findings.

To achieve greater effectiveness and efficiency in administering the field program, the two groups of field employees were combined in 1942 under the title of "Federal Credit Union Examiner." Since then the Federal Credit Union Examiner has been responsible for carrying out both the supervision and examination responsibilities in the field.

The joint conference with the credit union officials routinely held at the conclusion of each examination was also inaugurated in 1942. As a means of bringing the findings of the examiner to the attention of the officials, this joint conference has since proven to be one of the most popular and helpful parts of the supervisory examination program. At such a con-

ference, the Federal Credit Union Examiner personally discusses his examination findings with the officials so that there will be a clear understanding by the officials as to the specific conditions existing at the time of the supervisory examination. The officials can then give them immediate attention.

The Federal Credit Union Act provides that fees shall be assessed for the examinations. Originally, the Federal credit unions were billed semiannually for the examinations that had been made during the past six months. Beginning in 1943, the Federal Credit Union Examiner was authorized to submit a bill to the credit union being examined and to collect the fee at the time of the completion of each examination. This change eliminated considerable paper work and also brought the collection of the examination fees on a current basis.

The examination fees were gradually increased until 1953 when these fees, together with the supervision and charter fees, were sufficient to cover the Bureau's total cost of operation. In 1953, therefore, the Bureau became self-supporting from the fees collected from Federal credit unions.

During the past 30 years, the trend in the supervisory examinations of Federal credit unions has been steadily toward greater emphasis on financial analysis as distinguished from test checks and other auditing procedures. This emphasis thus transfers the audit function to the local credit union's supervisory committee which has the audit responsibility by direction of the Federal Credit Union Act.

#### *Federal Credit Union Accounting*

The accounting system in use today in many of the larger Federal credit unions is far different from that of the first Federal credit unions that were organized 30 years ago. Then, all accounting was done by hand. Today, an increasing number are using computers and

other types of advanced data processing accounting machines.

Adjustments have naturally been needed in the accounting system to meet the changing conditions in the credit unions. However, the basic system developed in the late 1930's has remained the standard system and is still quite generally being used by all new Federal credit unions as they commence operations. All changes, adaptations, adjustments, and additions have been built upon this original system.

In 1954, the format of the Accounting Manual was changed to give greater assistance to the new treasurer in a new Federal credit union. The first part of the Manual was designed in such a manner that a new treasurer of a credit union could be led, step by step, by instruction and illustration, from his first receipt of cash until he closed the books at the end of the accounting period and prepared the necessary reports.

At the close of 1961, the Bureau released a revision of the Supervisory Committee Manual which established as a standard that the supervisory committee would make one comprehensive annual audit and three quarterly audits of lesser magnitude during each year. This standard eliminated the difficult and rather impractical expectation set forth in former Supervisory Committee Manuals that the supervisory committee would, each year, make four comprehensive audits, one in each quarter. A set of standard work papers for the assistance of supervisory committees was also developed and illustrated in the 1961 Supervisory Committee Manual.

Each year more of the supervisory committees, as their credit unions increase in size, call on practicing public accountants, either to assist them in making, or to make independently, the comprehensive annual audit including the verification of the members' accounts.

## SECTION V

# CHARTERING OF FEDERAL CREDIT UNIONS

### Review of Developments in 1964

The number of operating Federal credit unions reached an all-time high of 11,278 at December 31, 1964. 580 charters were issued in that year. The net increase in number of operating Federal credit unions was 323, the same net increase that was reported for the year 1963.

Nine states and the District of Columbia accounted for 61 percent of the charters issued in 1964. Those jurisdictions and the number of charters issued in each are as follows: California 53, Pennsylvania 52, New York 49, Illinois 48, Texas 34, Ohio 38, Indiana 26, New Jersey 21, District of Columbia 20, and Massachusetts 15.

The first three states in chartering activity also ranked in the same order with respect to the number of operating Federal credit unions at the end of the year: California 1,128, Pennsylvania 1,107, and New York 968.

The maps on page 35 shows the number of operating Federal credit unions in each state or other jurisdiction on December 31, 1964.

In 1964, the District of Columbia credit union law was repealed and the sixteen credit unions operating under District of Columbia charter were converted to Federal credit unions. The conversion legislation was requested by the District of Columbia Credit Union League, and the credit unions chartered by the District of Columbia, and was supported by BFCU and the District of Columbia Government.

Also significant in 1964 was the ratio of liquidations commenced to the number of operating Federal credit unions at the beginning of the year. The ratio for 1964 was 2.71 percent, compared with a post-war high of 3.75 percent in 1958. The trend of liquidations is

influenced considerably by fluctuating economic conditions.

Although the number of new liquidations per year has remained fairly constant in recent years, the number of liquidations in process at the yearend has been steadily reduced from 408 at the end of 1961 to 318 at the end of 1964. This means that the average time required to complete liquidations and pay off the members' shares is being substantially reduced.

Mergers of Federal credit unions have been comparatively few in number. Twenty-two charters were cancelled in 1964 because of the mergers, the largest number completed in any year. This includes only those cases where a Federal credit union was the continuing credit union.

### Thirty Years of Growth

The first Federal credit union charter was issued to the Morris Sheppard Texarkana Federal Credit Union, Texarkana, Texas, on October 1, 1934. The chart on page 34 shows the growth of the Federal credit union system—charters issued, charters canceled, and net increase in number of operating Federal credit unions—during the thirty-year period ending December 31, 1964.

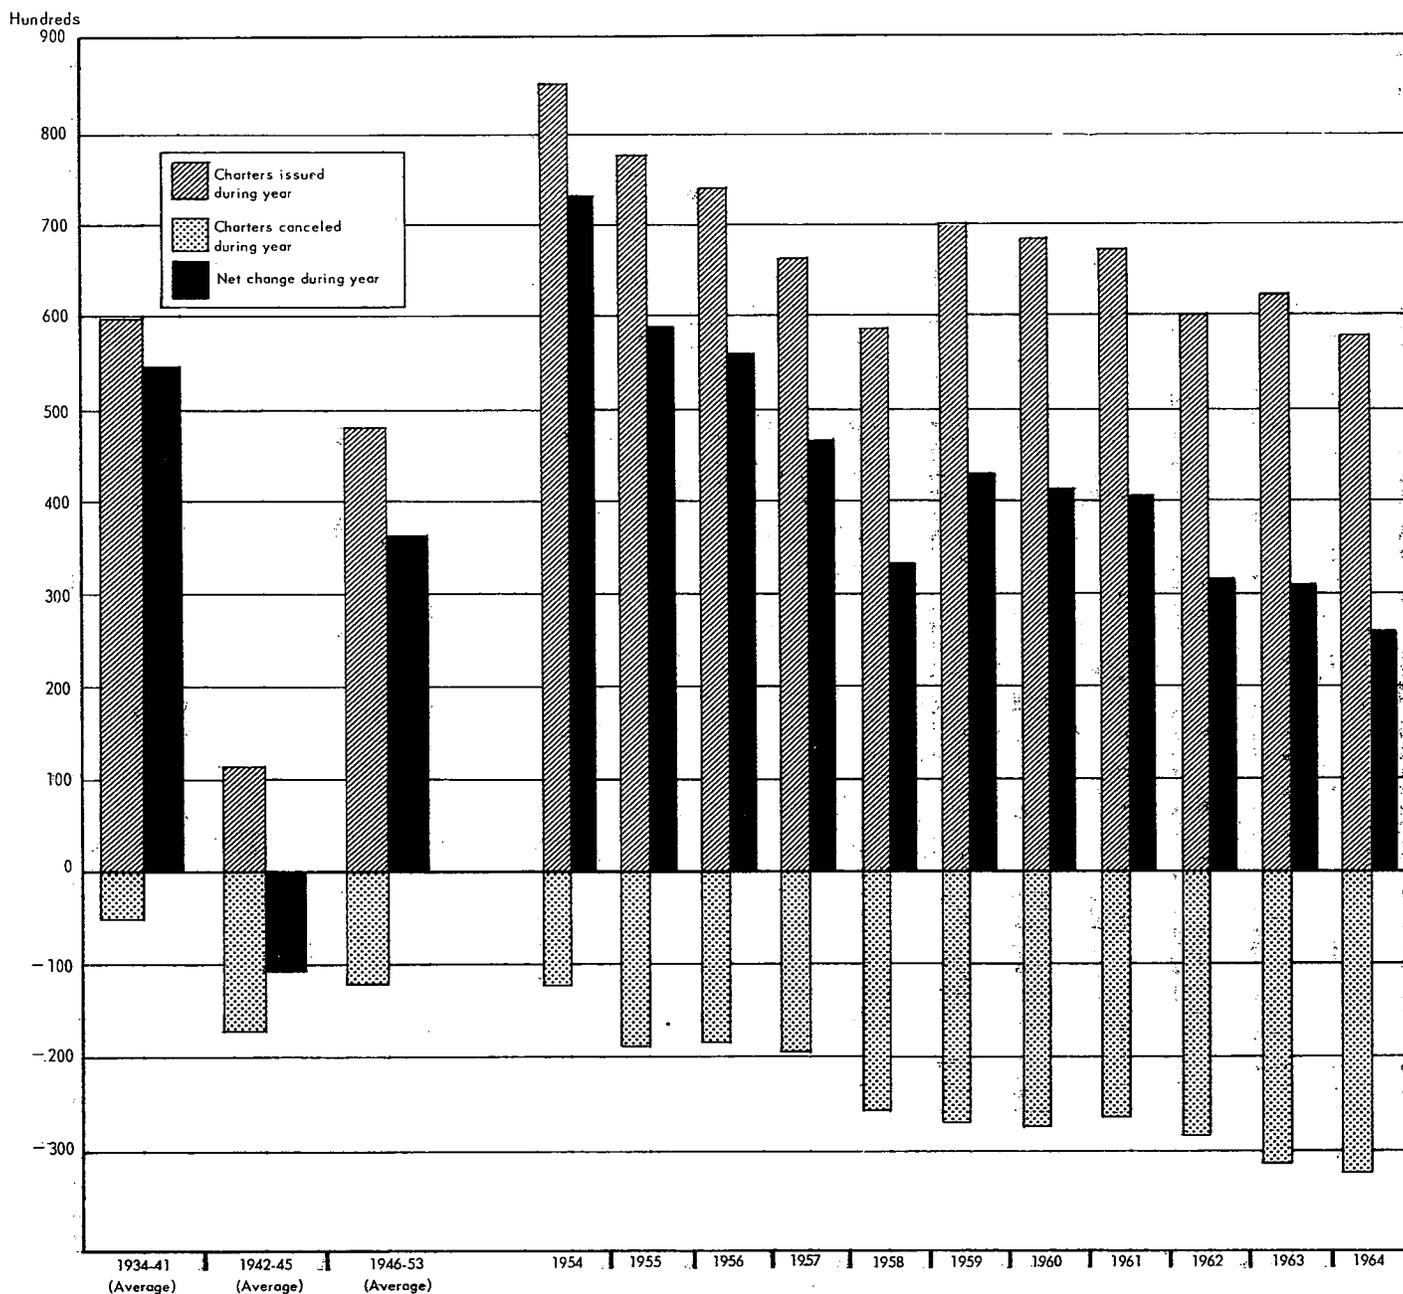

When the Credit Union Section became operative in the Farm Credit Administration, emphasis was on the organization of credit unions. Because of this emphasis, 828 Federal credit union charters were issued in 1935 and 956 charters, the all-time high for one year, were issued in 1936.

With a change in emphasis from organization to supervision in 1937 and 1938, chartering leveled off to an average of 586 per year for the remainder of the pre-war years.

As would be expected, in the early years of the program the number of new Federal credit union charters issued greatly exceeded the number canceled, and by the end of 1941 there were 4,228 Federal credit unions in operation. More than one-half of these groups were in six States—New York, Pennsylvania, Texas, California, Ohio, and New Jersey. Eighty-six percent operated among occupational groups, and almost one fourth of these consisted of Governmental and educational groups.

With the heavy buildup of the armed forces and concentration on the war effort in the World War II period, the number of new Federal credit union charters was sharply reduced. The number of liquidations mounted rapidly. In 1942, for the first time, liquidations outnumbered new charters issued—270 liquidations commenced and only 187 charters issued. Only 108 charters were issued in 1943 while more than 300 liquidations were commenced. During the period 1942 through 1945, new charters averaged only 115 per year, compared

NUMBER OF FEDERAL CREDIT UNION CHARTERS, ISSUED, CANCELED, AND NET CHANGE, 1934-64.

with an average of 220 charter cancellations per year. New liquidations exceeded new charters in each of those four years. As a result, by the end of 1945 the number of operating Federal credit unions had declined to 3,757. The six leading States continued to account for about the same percentage of total operating groups as they had at the beginning of the war. Federal credit unions operating among Governmental and educational groups went through the war period with relatively smaller declines in number than did credit unions in other occupational categories.

The ending of the war in 1945 released a long-restrained demand for more durable consumer goods. Also, promptly following the close of the war there was a mushrooming of plans and sentiment for better employee relations and increased fringe benefits for employees. Federal credit unions benefited from both of these developments.

In 1946, for the first time in five years, the number of new charters issued exceeded the number of liquidations commenced. The margin was narrow but it was the beginning of the great post-war expansion of the Federal Credit Union System. The number of charters issued annually increased steadily from 157 in 1946 to a post-war peak of 852 in 1954. This was a period of great economic expansion in the United States. Credit unions benefited from this general environment of prosperity. During the period from 1946 through 1954 the number of new charters annually averaged 522 compared with only 119 charter cancellations per year. The number of outstanding Federal credit union charters increased by an average of 403 annually, with the result that there were 7,227 operating Federal credit unions at the end of 1954. The greatest increase in any post-war year was in 1953, when new charters exceeded new liquidations by 669.

Chartering activity during the last ten years, 1955 through 1964, has been relatively stable. It could not be expected that chartering would continue indefinitely at the same upward trend that was experienced in the early post-war years. Yet, during the last ten years the average number of new charters per year was 662, which is 140 more than the average during the nine years immediately following the war. The 580 charters issued in 1964 indicate continued strong activity in the field of chartering.

As the number of operating Federal credit unions increases, it is to be expected that there

will be some upward trend in the number of liquidations commenced per year. New liquidations per year, however, are averaging less than three percent of the credit unions operating at the beginning of the year.

The net annual increase in number of operating Federal credit unions continues to average well in excess of 300.

While the large number of operating Federal credit unions has necessitated a major emphasis on the examination of Federal credit unions, the Bureau has continued to be interested in the organization of Federal credit unions and the extension of credit union service to more people.

The Bureau's statement of chartering practices and the investigation report forms have been designed so that a competent volunteer organizer can work with an interested, prospective credit union group, make an appropriate investigation, and supply the information needed by the Director to determine whether the proposed charter should be issued. The Bureau encourages volunteer organizers to assist qualified groups in establishing Federal credit unions. It is also pleased to provide examiner assistance to people who are working with eligible groups that are interested in obtaining credit union service. Such assistance can be obtained by contacting the local Federal credit union examiner or the Bureau's Regional Representative.

#### *Other Activities*

In addition to guidance of the program for the organization of new Federal credit unions, the Division of Organization and Standards also is responsible for general supervision of liquidations, mergers, conversions, and partial liquidations. Charter and bylaws amendments are also with the responsibilities of this Division.

Standard, printed procedures have been prepared and are available through the Regional Representatives to the officials of any Federal credit union that is to be involved in a liquidation, merger, conversion, or partial liquidation.

In order to expedite service to credit unions, most of the handling of charter and bylaw amendments has been decentralized to the regional offices. The Regional Representative is authorized to give preliminary approval to all routine, standard amendments of either the charter or the bylaws. Only the more complex

bylaw amendments and most significant amendments to fields of membership are submitted to the Washington office for preliminary approval by the Director. All amendment certificates are issued by the Regional Representative.

### Liquidation of Federal Credit Unions

Federal credit unions exist for the sole purpose of providing savings and borrowing facilities to their members on a cooperative, non-profit basis. When the need for these services ceases to exist, when the common bond among the members is dissolved or when the credit union can no longer function because of a lack of interested and competent management, the credit union will liquidate.

During the thirty-year history of the Federal credit union program, 4,371 Federal credit unions completed liquidation. The four-year period of World War II, for example, accounted for 880 Federal credit union charter cancellations. In the main, those credit unions that ceased operation during the war years did so because they were not needed or because there was a shortage of qualified people to run them. Concentration of human resources on the war effort left many credit unions without competent leadership. Also, during the war years, there was much less need for consumer credit because of the dearth of durable consumer goods and individuals were encouraged to put their savings into War Bonds as a patriotic service.

### *Size of Liquidating Credit Unions*

Liquidating credit unions have averaged much smaller than operating credit unions. For example, the shares at commencement of liquidation of credit unions for which charters were canceled in 1964 averaged only \$41,750, compared with average shares of \$315,163 in operating Federal credit unions as of Decem-

ber 31, 1963, and \$356,215 in Federal credit unions operating as of December 31, 1964.

This disparity in size between operating and liquidating credit unions can be explained in part by the fact that there is considerable relationship between the size of a group, its stability, and its prospects for operating a successful credit union. The larger companies or organizations are more likely to have a sufficiency of capable leaders who are available to manage and develop the credit union. A common reason for liquidation has been inability over a period of years to build sufficient membership participation to make the credit union worthwhile. Another common cause of liquidation is dissolution or substantial curtailment of operations of the company in which the credit union operates. These situations occur most generally in small companies or small organizations that naturally would have only a small credit union.

### *Losses to Members*

An obviously important question is the extent of losses of savings of members as a result of liquidation of Federal credit unions.

For the period from 1936, when the first Federal credit union completed liquidation, through 1964, members' shareholdings have totaled \$68,746,567 in the 4,371 Federal credit unions that have completed liquidation. 3,443 of the credit unions, which held \$62,094,193 in shares, returned to their members 100 percent or more of their shares. These credit unions paid their members liquidating dividends totaling \$4,507,257. 928 of the liquidating credit unions returned to their members less than 100 percent of their shares. Shareholdings in these credit unions totaled only \$6,652,374. The losses to the members amounted to only \$1,214,287, or about one-fourth as much as the liquidating dividends in those credit unions that returned more than 100 percent.

. . . .

## SECTION VI

### RESEARCH PROGRAM

The Bureau greatly expanded its research program in 1964. Early in the year, a new Division—the Division of Statistical Research and Analysis—was established for the purpose of planning and carrying out a more comprehensive program of research based on trends and developments in credit union statistics.

#### *The Monthly Statistical Program*

One of the early tasks of the new Division was to arrange with the Board of Governors of the Federal Reserve System for the Bureau

to assume responsibility for the monthly data collection program for Federal and State-chartered credit unions. Transfer of responsibility for this program to the Bureau had been proposed by the Board, with the thought that there would be advantages in having it administered by an agency that was closely associated with credit union operations.

The monthly credit union statistical program was administered for many years by the Federal Reserve in connection with its respon-

<sup>1</sup> For States comprising BFCU regions, see page v.

<sup>2</sup> Data for all State-chartered credit unions by asset size will be available beginning in 1964.

sibilities for collecting and compiling estimates of consumer credit. Under Federal Reserve auspices, the collection and processing of monthly credit union reports was handled by the twelve Federal Reserve Banks, which forwarded summarized reports for their Districts to the Board in Washington.

With the cooperation of participating credit unions, arrangements were completed for the Bureau to begin administering this program in August, 1964. In order to assure continuity of the reports and to provide time for solving any unforeseen problems in the Bureau's reporting program, the monthly statistics were collected and compiled by both the Board of Governors and the Bureau for a period of three months.

In October, 1964 the Board of Governors instructed the Federal Reserve Banks to suspend their collection of the monthly statistics from credit unions. Since that time, the Bureau has had sole responsibility in this area, including that of furnishing the Board of Governors with the credit union data needed to compile their monthly consumer credit series.

*Reporting Forms and the Sample.* The monthly credit union statistical program is based on reports made voluntarily by a group of about 1,350 credit unions throughout the country. The monthly reporting forms, shown in pages 43-45 at the end of this Section, provide for reporting of selected balance sheet items, loan and share volume, information on delinquent loans, and the number of members of the credit union. This information is readily available to most credit unions shortly after the close of each month.

As of the end of 1963, the monthly sample consisted of 690 Federal and 667 State-chartered credit unions. The composition of the sample by BFCU region and by asset size of credit union is shown in the accompanying table.

A review of the sample indicated that it would be desirable to obtain participation of more large credit unions throughout the country. In October 1964 the large Federal credit unions that were not already participating in the program were asked to consider doing so. Substantially all of these groups were taking part by the end of 1964. Mailing lists are being compiled of large State credit unions so that they may be requested to participate in the program in the near future.

While additional coverage of the large credit unions is expected to improve the accuracy of the sample with respect to over-all monthly changes, the sample still will not be adequately representative of the operations of small credit unions, or of credit unions in various regions of the country. As resources permit, the sample will be reviewed for the purpose of removing these deficiencies.

*Reporting Procedures.* Unlike the regional data collection and processing arrangements under Federal Reserve System auspices, the monthly statistical program is centrally administered by the Bureau's Washington office, with the assistance of the Social Security Administration's electronic data processing facilities in Baltimore, Maryland. Almost all aspects of this program are now handled by means of electronic data processing equipment. In no other way would it be possible to process the reports and produce figures for publication within a three or four week period after the end of each reporting month.

The report forms are addressed in a computer operation and are forwarded, with an addressed, postage-free return envelope, to the credit unions near the end of each month. Credit unions are asked to fill out their report as soon as their month-end figures are available, retain a copy for files, and return the original to the Bureau by the tenth of the month.

When completed forms are received, they are reviewed and forwarded for processing to the Social Security Administration. Near the end of the third work week in each month, a computer edit, involving logical and balancing checks, is made of each report, together with a check for consistency between reports for individual credit unions for the current and preceding months. Errors or apparent discrepancies revealed by this procedure are either corrected by letter to the credit union or by other means.

A second edit, usually taking place about five working days or so after the first, produces preliminary percentage changes from the preceding month in the various items on the report. These changes provide the basis for estimation of the data included in the Bureau's monthly release.

About the middle of the following month, final estimates are made on the basis of more complete credit union reporting, as well as correction of discrepancies that were turned up in the first two edits.

*Benchmark Data.* Monthly estimates are subsequently revised on an annual basis when the Bureau tabulates its reports for credit unions as of the end of each year. These benchmark figures are compiled from reports as of December 31 of each year from all operating Federal credit unions, and from summary reports received from State supervisory authorities for operating State credit unions. The annual forms for Federal credit unions (Form FCU-521) and the summary report for State-chartered credit unions (BFCU-523) are shown on pages 46 and 47 at the end of this Section.

The forms used for the monthly program contain some information that is not published at the present time. Much of this material will be published in the future, however, after sufficient experience has been accumulated to permit an evaluation of the representativeness of the reports and consistency of the data with respect to credit union developments on a national scale.

*Seasonally Adjusted Series.* In order to facilitate interpretation of short run developments in credit union statistics, the Bureau has prepared seasonal adjustment factors for Federal and State-chartered credit union loans, savings, and total assets.

These factors make it possible to eliminate those changes in the data that occur in particular months year after year, solely as a result of seasonal influences. Seasonally adjusted figures for the principal balance sheet items are shown currently in the monthly release. These series, seasonally adjusted and unadjusted, for the period December, 1955-1964, are contained in Tables 27-29, Section IX of this Report.

#### *Annual Statistics for State-chartered Credit Unions*

With the cooperation of State supervisory authorities in the 44 States and Puerto Rico that have local credit union laws, the Bureau's report for annual statistics for State-chartered credit unions was revised in 1964 to provide data that are more comparable with yearend figures for Federal credit unions, and to make available, for the first time, information on the number and selected balance sheet data for State-chartered credit unions, by asset size.

A number of items are included in the revised report for the first time and, to the extent the data are collected, compiled, and furnished to the Bureau by State authorities, they will be presented in summary form in

the Bureau's report on State credit union operations for 1964. The new items on the form shown are as follows:

- Number and amount of loans delinquent 2 months or more.
- Cash on hand and in banks.
- Total investments.
- U.S. Government securities.
- Other assets.
- Notes payable.
- Other liabilities.
- Number of potential members.

Also requested for the first time is a breakdown by selected asset size groups of the following items:

- Number of credit unions.
- Total assets.
- Total loans outstanding.
- Members' shares.
- Members' deposits (if applicable).

In addition to the new information that will be available for State-chartered credit unions, efforts have been made to obtain certain statistics covering the operations of State central credit unions. This information is of interest for itself, and it will make it possible for interested users to make adjustments to eliminate a small amount of double counting of outstanding loans and savings in the balance sheets of State central credit unions.

\* \* \* \*

In addition to the above projects, the Bureau emphasized, and made significant progress in, the following areas of research in 1964:

#### *Purpose of Loans Made by Credit Unions*

In response to widespread interest among economists and financial analysts in and out of Government, as well as among credit union people, concerning the purposes and characteristics of credit union loans, the Bureau is exploring the possibility of working out a voluntary reporting program to provide this information.

There is, of course, a need to keep the work load of this and similar projects at a minimum in view of limited staff resources available to many credit unions. Actually, however, some credit unions now maintain records of the purposes for which they make loans. They find such information useful as an aid in the management of their loan portfolios and as a guide to their lending policies. With proper planning, assistance, and encouragement, it is likely that many more credit unions would

keep such records both for their own benefit as well as for the analytical value of such information to those interested in credit union activities.

*Credit Union Services*

Progress was made in 1964 in examining the possibility of conducting a survey of credit unions that operate among low-income groups. One of the major purposes of such a survey would be to learn how credit union services might be mobilized to improve the economic status of low-income groups. The Bureau is working in several areas to encourage credit unions to aid such groups, as discussed more fully in Section VII.

*Use of Automatic Data Processing Equipment*

It was found to be advantageous for the Bureau to make greater use of automatic data processing facilities in 1964 in order to meet the additional data processing requirements associated with its expanding research program and current data collection activities. As has been indicated, the timely publication schedule asso-

ciated with the monthly statistical program would not be possible without the use of such equipment.

Plans are being made for increasing the use of electronic data processing equipment in the near future. One of the principal projects involves working out procedures for computer processing of the yearend Financial and Statistical Report, which at present contains 58 pieces of balance sheet and other statistical information. Eleven thousand two hundred seventy-eight Federal credit unions submitted these reports for 1964.

Processing of these reports by electronic equipment would not only reduce the amount of clerical checking, verification, and proofing, but it would help to advance the availability of the statistics. It would also facilitate subsequent use of these data in research projects.

The proposed program to obtain current information on purposes of loans would also require electronic data processing to cope with the workload that would be involved, and still provide accurate and prompt information.

INSTRUCTIONS

Complete and mail YELLOW copy of the report on or before the 10th of the month following the month to which the figures relate. Retain the WHITE copy for your files.

The report should be prepared in accordance with instruction in pertinent Sections of the Accounting Manual for Federal Credit Unions.

1. Total Assets/Liabilities and Capital. Total Assets--which equals Total Liabilities and Capital--represents the sum of items 2, 3(a), and 6 plus all other assets not shown separately, such as Prepaid Insurance, Furniture and Fixtures, Land and Buildings, etc. This total should agree with Total Assets as reported on your Form FCU-109 for the corresponding month.

ASSETS - Selected Items

2. Cash on hand and in banks. Represents the sum of the end-of-month balances in accounts 104, 105, and 106; includes deposits in savings banks, and savings certificates.
3. (a) Loans outstanding, end of month. Total number and outstanding balances of loans to members in account 101.  
(b) Loans delinquent 2 months or more. Number and unpaid balance of all delinquent loans, which should equal the sum of the number and amounts shown on Form FCU-109 for loans delinquent 2-6 months, 6-12 months, and 12 months and over.  
(c) Real estate loans outstanding. Represents loan balances included in item 3(a) that are made to purchase real estate.
4. Loans made during month. Represents all new loans made during the month, including refinanced loans.
5. Loans repaid during the month. Represents total repayments on loans during the month including amounts refinanced by new loans.
6. Total investments. Represents the sum of the end-of-month balances in accounts 107, 108, 109, and 118. Exclude savings certificates shown in item 2.  
(a) U.S. Government obligations. Balance in account 107, which is included in item 6 above.

LIABILITIES - Selected Items

7. Notes payable. End-of-month balance in account 302.
8. Shares outstanding, end of month. Month-end balance in Shares account, plus balances in any special savings accounts in the credit union, such as Christmas savings and vacation savings accounts.
9. Shares paid in during the month. Total credits during the month to the Shares account (Account 310)--excluding amounts credited to shares under payroll Plan No. 2--plus members payments into special savings accounts.
10. Shares withdrawn during the month. Represents total debits during the month to the Shares account--except transfers to Loans, Interest on Loans, and Fines under Payroll Plan No. 2--plus members' withdrawals from special savings accounts.
11. Deposits outstanding, end of month. This item does not pertain to Federal credit unions.
12. Number of members (regular accounts), end of month. The total number of membership accounts (including joint accounts) at month-end.

**INSTRUCTIONS**

Complete and mail BLUE copy of the report on or before the 10th of the month following the month to which the figures relate. Retain the WHITE copy for your files.

1. Total Assets/Liabilities and Capital. Total Assets—which equals Total Liabilities and Capital—represents the sum of items 2, 3(a), and 6 plus all other assets not shown separately, such as Prepaid Insurance, Furniture and Fixtures, Land and Buildings, etc.

**ASSETS - Selected Items**

- Cash on hand and in banks. Represents the sum of end-of-month balances in all cash accounts, including change fund, petty cash, time and demand deposits in banks, and savings certificates.
- (a) Loans outstanding, end of month. Total number and outstanding balances of loans to members only. Exclude loans to other credit unions which should be reported in item 6, Total investments.  
 (b) Loans delinquent 2 months or more. Number and unpaid balance of all loans to members, included in item 3(a) above, that are delinquent 2 months or more.  
 (c) Real estate loans outstanding, end of month. Represents loan balances included in item 3(a) that are made to purchase real estate.
- Loans made during month. Represents all new loans made to members during the month, including refinanced loans.
- Loans repaid during month. Represents total repayments on members' loans during the month, including amounts refinanced by new loans.
- Total investments. Represents U.S. Government obligations, savings and loan shares, loans to other credit unions, and other investments. Exclude savings certificates shown in item 2.

(a) U.S. Government obligations. Investments in U.S. Government obligations only. This amount is included in item 6 above.

**LIABILITIES - Selected Items**

- Notes payable. End-of-month balance of funds borrowed by the credit union from any source on notes executed on behalf of the credit union.
- Shares outstanding, end of month. Month-end balance in Shares account, plus balances in any special savings accounts in the credit union, such as Christmas savings and Vacation savings accounts. Exclude members' deposits which should be shown in item 11 below.
- Shares (and deposits) paid in during the month. Total credits during the month to the Shares and Deposits accounts plus members' payments into any special accounts (Christmas savings, etc.). Do not include transactions under a payroll deduction plan that provides for periodic deposits into the Shares account of payroll deductions that are subsequently transferred to Loans, Interest on Loans, and Fines accounts.
- Shares (and deposits) withdrawn during the month. Total debits during the month to the Shares and Deposits accounts plus members' withdrawals from special savings accounts. Do not include transactions under a payroll deduction plan such as that described under item 9 above.
- Deposits outstanding, end of month. This item pertains only to credit-unions located in States that permit deposits in addition to shares. Credit unions in these States should show the month-end balance in the Deposits account.
- Number of members (regular accounts), end of month. The total number of membership accounts (including joint accounts) at month-end.

**Section C: SPECIAL RESERVE COMPUTATION**

COMPUTE FOLLOWING TO DETERMINE WHETHER SPECIAL RESERVE IS NEEDED

Refer to Account 101, Loans (your Form FCU-109 for December 1964):

Loans: Delinquent (a) 2 months to 6 months . . . \$ . . . . . x 10% = \$ . . . . .

Delinquent (b) 6 months to 12 months . . . \$ . . . . . x 25% = \$ . . . . .

Delinquent (c) 12 months and over . . . \$ . . . . . x 80% = \$ . . . . .

Total reserve requirement . . . . . \$ . . . . .

Deduct: Balance of Account 311, Regular Reserve . . . . . \$ . . . . .

Amount needed in Special Reserve for Delinquent Loans, Account 316 . . . . . \$ . . . . .

Any amount needed in Special Reserve for Delinquent Loans must be established and so shown on the front of the form in Account No. 316 before any dividend is paid. See pages 86 and 87 of Accounting Manual for Federal Credit Unions for instructions on establishing and maintaining Special Reserve for Delinquent Loans.

\$5,000,000 or more					

Please list names and addresses in "Comments" section on page 3.

This is actually a 4-page form, folded to 8" x 10 1/2". Pages 3 and 4 (not shown) represent space for comments and/or listing of names and addresses of credit unions with assets of \$2 million or more, and signature and title of person furnishing the information (page 3); and instructions for completing the form (page 4).

## SECTION VII

### SPECIAL PROGRAMS

#### Credit Unions for Low-Income People

The Federal Government is placing a great deal of emphasis on programs to improve the economic status of low-income groups in our society. Credit unions fit readily into such a program, for they have shown for more than a hundred years, here and abroad, that a group of people can improve their economic lot through cooperation.

Credit unions originated among the poverty stricken villagers of Germany. They were successful in alleviating many of the problems which accompany poverty. The credit union idea spread through Europe—then to Canada and the United States and later to South America. Through credit unions, the poor laboring classes in Quebec and the impoverished fishermen of Nova Scotia improved their financial condition. More recently, the Peruvian Indians established and used their credit unions to improve their economic lot.

Historically, credit unions have played an important role in bringing thrift and credit facilities to people of small means who otherwise would not have access to legitimate financial services. Persons who would benefit from credit union services, the members themselves, made the necessary effort to manage and operate their own financial institutions. They proved that their credit unions could succeed even under adverse economic and social circumstances.

The Federal Credit Union System was established in 1934 with the passage of the Federal Credit Union Act. The country was then experiencing its worst depression. Members of Congress visualized the Federal Credit Union as a vehicle for economic improvement of a poverty stricken society. Credit unions were organized among eligible groups of people who believed that credit union ideals were economically sound. Some credit unions estab-

lished then in low-income groups have helped substantially with the financial problems of their members and are still operating successfully today.

In 1963 the Bureau made an inventory of Federal credit unions serving groups comprised predominantly of low-income people. More than 400 such credit unions were identified in this inventory. Many others have some low-income people in their fields of membership.

The Bureau has recently increased its effort to extend credit union service to more groups of people whose incomes are substantially lower than average for the areas in which they are situated. It is cooperating with various national and local organizations, governmental agencies, and credit union trade associations in the establishment of experimental Federal credit unions in low-income groups. Bureau personnel have participated in study-club and instructional programs designed to develop interest in credit unions. They have helped prepare and guide leaders to assume management responsibilities in newly organized credit unions.

Credit unions were established in three low-income public housing projects in New York City. These credit unions have made satisfactory progress since they were organized in 1963 and 1964, demonstrating that such credit unions can successfully provide financial assistance to low-income people.

The Bureau assisted in the establishment of several credit unions in low-income groups in the National Capital. Each of these credit unions is a part of a community action program in which many other services will be provided. The experience gained with these credit unions may be helpful in the establishment of similar credit unions in community action programs throughout the country.

Several credit unions have been established to serve groups of handicapped persons whose income generally is lower than average. The Bureau has also worked with organizations of "senior citizens" in the development of some special material to promote the organization of credit unions among retired people.

Efforts have been made and are continuing to establish credit unions to serve Indians on some of the reservations.

Since many low-income people have for years been victimized by unscrupulous merchants, high-rate money lenders, and house-to-house salesmen, they have sometimes looked upon credit union leaders as they do upon other strangers—as just someone else who seeks to gain at their expense.

Gradually, their skepticism is being overcome and they are beginning to realize that these programs and plans can and do benefit them. The credit union plan is one which has unfolded as a workable device for groups which, heretofore, could not see how their small amount of earnings would buy more goods through the wise use of money and credit. Many more groups need to learn this fact.

With the concerted emphasis now to help people in poverty stricken areas, the Bureau expects to participate more extensively in the establishment of more credit unions to serve low-income people.

### **International Activities**

During 1964, the Bureau of Federal Credit Unions continued to furnish information and training to people in foreign lands who are interested in developing a credit union program. The newly-developing countries, particularly, seem cognizant of the importance of credit unions in improving the economic stability of their citizens.

The Bureau is pleased to share its technical knowledge for developing new credit unions and for expanding and improving existing ones. In particular, it has shared its know-how in the examination and supervision of credit unions.

Many credit union leaders and interested government officials requested information and copies of the Bureau's instructional manuals and informational publications during the year. Among the countries seeking information about the Federal credit union program were the British Solomon Islands, Ceylon, France, Ghana, New Caledonia, the Philippines, Tanganyika, Taiwan, and Western Samoa. Visit-

ors seeking information about the program were received from Argentina, Ecuador, Indonesia, Honduras, Paraguay, Tanganyika, Trinidad, and Venezuela.

Specialized training also was given to people from foreign lands. A training course in credit union operations and examination was provided in Puerto Rico, for an official of the Government of Ecuador. In November, a cooperative officer from the Department of Co-operative Development in Kenya began a course of training which emphasized examination and supervision techniques used by the Bureau. The Department of Co-operative Development in Kenya requested this training to help in establishing an examination and supervision program for credit unions in that country.

The Social Security Administration was host to the International Social Security Association, during October, when its annual meeting was convened in Washington. This organization is composed of welfare leaders and sociologists in both private organizations and governmental agencies, from various parts of the world. During one of the sessions, the Bureau Director discussed with the participants the role of credit unions in building financial security for people.

The Bureau, for some time, has been called on for information and guidance in credit union programs. The strong development of credit unions in the United States made it natural for the newly-developing countries, especially, to turn to this country for help.

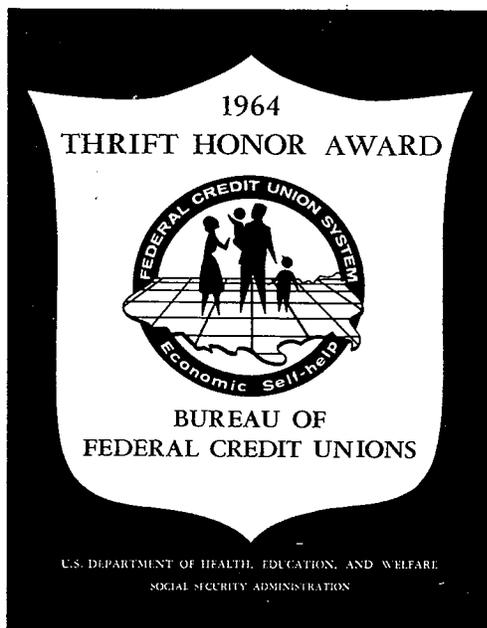

The Bureau has translated into Spanish, the Federal Credit Union Act, the standard by-laws, and the informational pamphlet, "Federal Credit Unions" (Form FCU-532C) as an aid to Spanish-speaking people in the United States as well as in Latin America. Upon request, these publications are being furnished to people in Spanish-speaking areas to help them learn about credit unions.

The first concentrated training program for representatives of foreign governments in the examination and supervision methods used by the Bureau was provided in 1952 for two cooperative leaders from Indonesia. One of these leaders was an official of the Cooperative Service for North Sumatra and the other was an official of the Cooperative Service of the Ministry of Economic Affairs in Djakarta. They spent three months with the staff studying the Bureau's methods and techniques so they could return and adapt these procedures to local

credit union program needs. Since then, specialized training was given to officials from the Republic of the Philippines, Trinidad-Tobago, and Peru.

Assistance to the credit union movement in Peru began in 1954 when, at his request, a set of Bureau instructional manuals and pamphlets was sent to Father Daniel McLellan in Puno, Peru. Under his guidance and leadership, the movement in Peru grew rapidly despite serious obstacles. In 1962, at the request of the Inter-American Development Bank, two Bureau staff members went to Lima to assist in finalizing a loan by the Inter-American Development Bank to the Central Credit Union of Peru. Subsequently, the Inter-American Development Bank sponsored Senor Mario Valdez for training with the Bureau in order that he could return and establish an examination program for the credit unions in Peru.

After 16 weeks of training with the Bureau in the United States, Señor Valdez returned to Peru and he, in turn, trained four additional examiners. He also translated into Spanish, the Federal Credit Union Accounting Manual, adapting it to fit the needs of the credit unions in Peru. This Spanish accounting manual, which was prepared exceedingly well, has been of great help to the credit union movement in many of the Latin American countries.

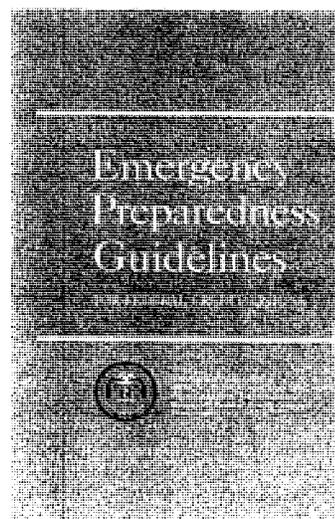

### Thrift Emphasized

During 1963 and 1964 the Bureau took special steps to encourage systematic thrift promotion. *Thrift Honor Awards* were granted to all Federal credit unions that achieved out-

standing results in increase of members' shareholdings. Both years showed a marked increase in growth of savings percentagewise as well as in dollar amounts. (see chart page 52)

This program is designed to achieve greater recognition of a Federal credit union's function in encouraging persons of small means to save systematically and thereby strengthen their economic position. Savings (shares) in Federal credit unions have always exceeded the total of loans outstanding. Both shares and loans tend to promote thrift since interest rates on loans are low.

Substantial shareholdings, well distributed among the members, add much strength to the credit union itself as an institution. They provide a solid base for loans made to members who have a nest egg of savings to offer as security. This is one of the reasons charge-off of loans by Federal credit unions is very limited. The overall losses charged to reserves amount to less than one-fourth of one percent of loans made.

### Emergency Preparedness

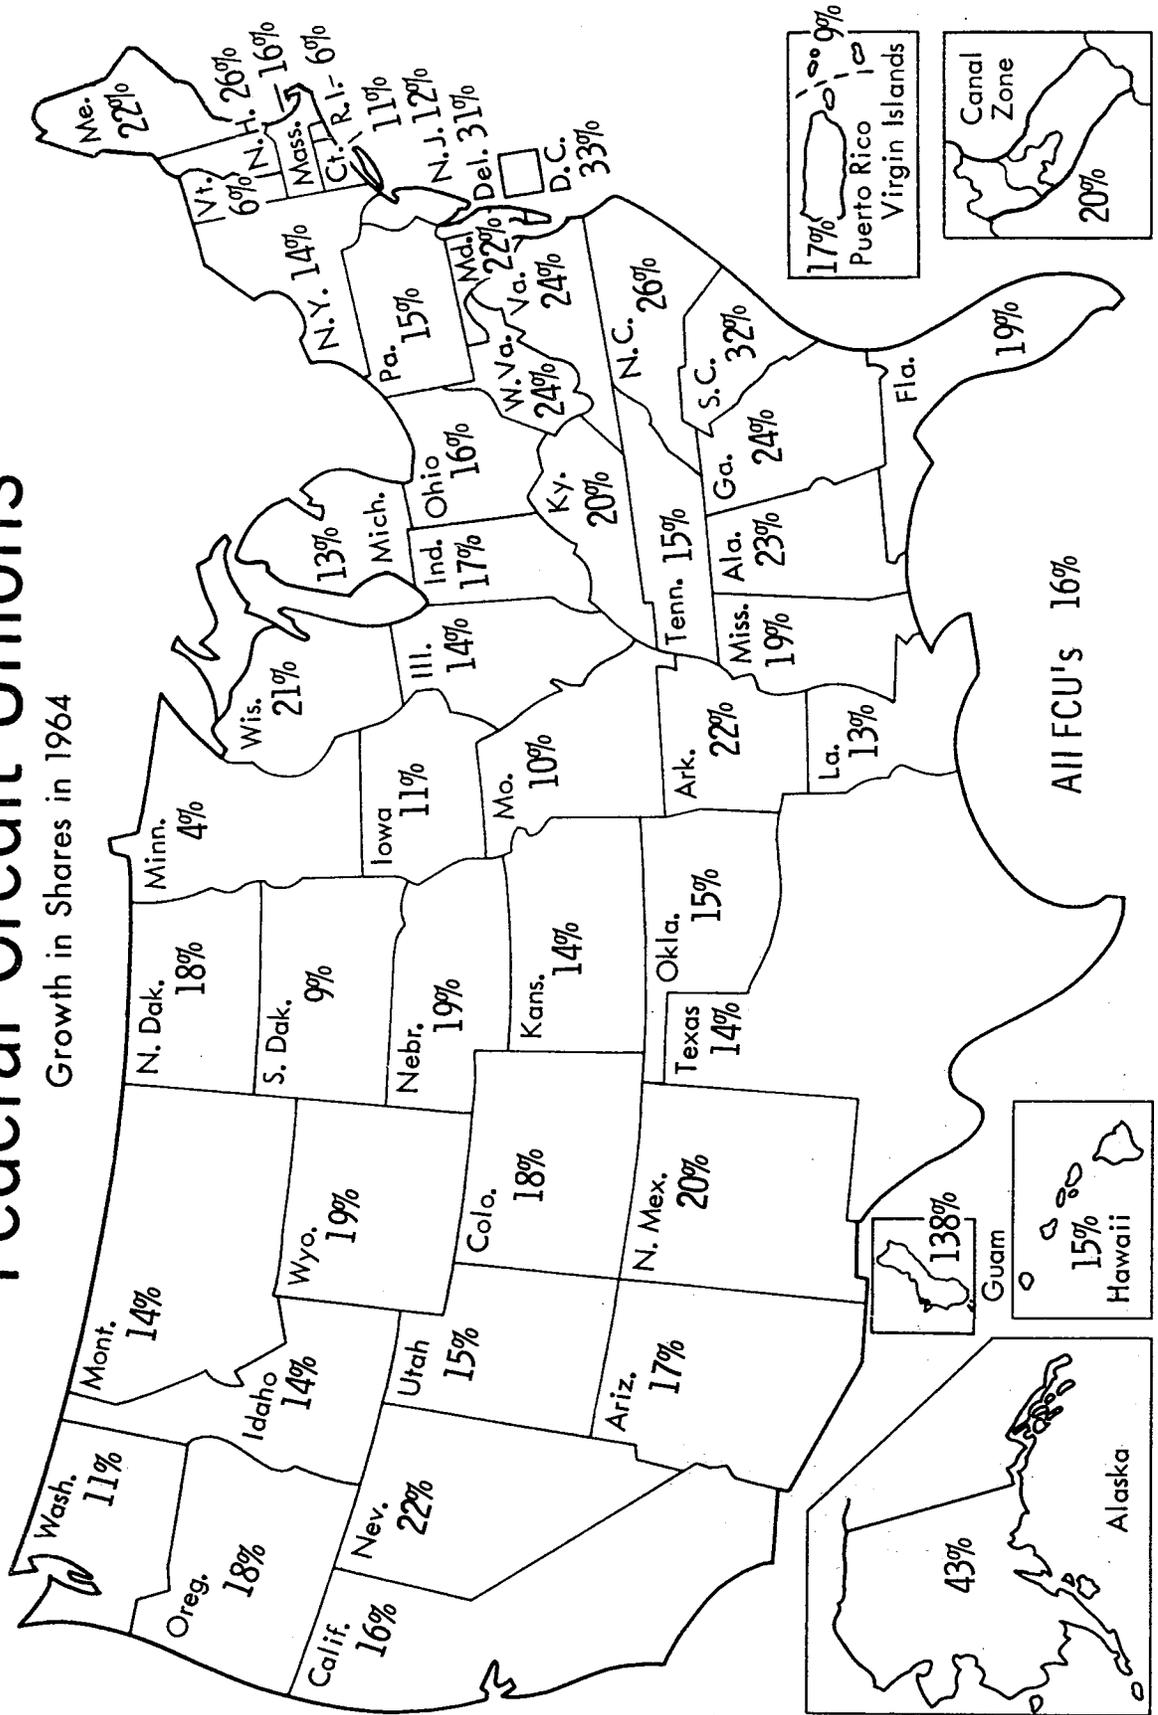

Federal credit unions, like other financial institutions, need to prepare themselves for emergencies. This was recently made clear in a series of events that recognize credit unions as important in the economic and credit system of the United States.

#### *National Plan*

The National Plan for Emergency Preparedness and the related Emergency Banking Regulation provide that credit unions are "banking institutions" for the purpose of that regulation. This standby regulation will become

# Federal Credit Unions

Growth in Shares in 1964

effective "immediately after an attack on the United States." It specifies that all banking institutions (including credit unions) shall remain open and continue their operations and functions and permit the transaction of business during their regularly established hours.

Delegations of "authority and power to take such action, consistent with regulations issued by the Secretary of the Treasury relating to the maintenance of the operations and functions of banking institutions, as may be necessary to maintain, regulate, limit, or suspend the operation and functioning of any credit union" were promulgated in 1963 successively by the Secretary of the Treasury, Secretary of Health, Education, and Welfare, and the Commissioner of Social Security to the Director of the Bureau of Federal Credit Unions. These delegations are effective immediately after an attack upon the United States.

In order to guide Federal credit unions in preparing for an emergency the Bureau of Federal Credit Unions in late 1963 issued the *Emergency Preparedness Guidelines* to all Federal credit unions. It also made this publication available to State chartered credit unions through the Superintendent of Documents, Government Printing Office, Washington, D.C. 20402. The price is 25 cents.

### *Records Preservation*

As a practical step to assist Federal credit unions in preserving key records, the Bureau arranged for a nationwide records preservation program. This program is described in detail in the *Emergency Preparedness Guidelines*. All a Federal credit union needs to do is to prepare copies of selected records or microfilm and send them to the underground storage facility. The Bureau will pay for the cost of this storage for all Federal credit unions that elect to use it.

During 1964 approximately 700 Federal credit unions took advantage of this service. The plan calls for replacement of the records annually or more frequently.

Federal credit unions were urged by the Bureau to utilize the service since it provides at least minimum protection against a variety of emergencies such as fire, theft, flood, explosion, earthquake, as well as actual attack upon the United States.

This is a continuing program that will be provided by the Bureau as long as it is useful to a large number of Federal credit unions. For a nominal charge the service is also available to State chartered credit unions.

## SECTION VIII

### MILESTONES IN FEDERAL CREDIT UNION HISTORY

**1934.** . . Federal Credit Union Act was approved June 26, 1934.

Claude R. Orchard was appointed Director of Federal Credit Union Section in the Farm Credit Administration. Federal Credit Union Section was established August 20, 1934.

First Federal credit union charter was issued to Morris Sheppard Texarkana Federal Credit Union in home town of Senator Morris Sheppard, who introduced the bill establishing the Federal credit union program.

**1935.** . . First group of Federal credit union investigators were selected and appointed from a civil service examination in late 1935 and early 1936.

*Cooperative Saving* magazine was first issued in mimeograph form. This publication was issued in more substantial format until 1943, but discontinued at that time as a war-time economy measure.

**1936.** . . Professional staff of Federal Credit Union Section, in January 1936, consisted of the following: Claude R. Orchard, Director; F. O. Billings, William Allen, Lance Barden, Claude Bergeron, Joseph Blomgren, George Boyd, Julia Connor, Harry Culbreth, James Dacus, Edward Hickey, Herbert Ingalls, Lowell Johnson, Edward Jutz, Oppie King, Claude Luce, Paul Mills, Clarence Oldham, Henry Peterson, Earl Powell, David Rambo, Howard Stamm.

Charter No. 1000 was issued January 31, 1936.

The first charter in the Territory of Hawaii was issued in August 1936.

During year, 956 Federal credit unions were organized, the largest number in any calendar year.

**1937.** . . Emphasis was shifted from organization of Federal credit unions to examination and supervision.

**1938.** . . By the end of 1938 Federal credit unions were operating in every State and in Hawaii and District of Columbia.

**1940.** . . Membership in Federal credit unions reached the first million.

**1941.** . . Assets of Federal credit unions passed \$100 million.

During 1941 the U.S. Treasury Department designated Federal credit unions as issuing agents for the sale of U.S. Defense Savings Bonds.

- 1942...** Federal credit union program was transferred, by Executive Order of the President, from Farm Credit Administration to Federal Deposit Insurance Corporation effective May 16, 1942.
- Federal credit union operations were decentralized to Federal Deposit Insurance Corporation District offices.
- Field staffs of examiners and field representatives were merged in one force and named Federal credit union examiners.
- Joint conference was inaugurated between Federal credit union examiner and officials of Federal credit unions at conclusion of each examination.
- In 1942, due to war conditions, number of Federal credit unions and their membership declined, but shares and assets continued to increase.
- 1946...** World War II having ended, Federal credit unions began a new era of growth and development. Loan demand almost doubled in one year.
- Significant was the job done by Federal credit unions in sale of U.S. Savings Bonds during war period. They sold over 12 million bonds with total purchase price over \$400 million which was more than twice their own assets. 1,837 Federal credit unions (out of 3,761) had qualified as issuing agents.
- Federal Credit Union Act was extended to include Panama Canal Zone.
- 1947...** Several manuals for Federal credit unions were developed, including the Handbook for Federal Credit Unions, and a revised Accounting Manual. These manuals were developed after conferences with Federal credit union leaders and State supervisory authorities.
- 1948...** On July 29, 1948, the Federal credit union program was elevated to Bureau status in the Federal Security Agency and was grouped with several other bureaus in the Social Security Administration. Claude R. Orchard was appointed Director and Joseph E. Blomgren, Deputy Director.
- Bureau staff in Washington in 1948 included William Allen, George Boyd, Kenneth Wimer, Erdis Smith, and Virginia Daw. The Bureau's first regional representatives were Lance Barden, James Coats, Jack Dublin, Herbert Ingalls, Buford Lankford, Reuben Lansky, Thornton Miller, and Robert Seay.
- The first Federal credit unions in Alaska and the Canal Zone were chartered.
- 1949...** Number of Federal credit unions for the first time exceeded the pre-war figure and growth of the program in all phases was strong.
- 1950...** This was the year in which membership in Federal credit unions passed 2 million.
- The first Federal credit union charter in Puerto Rico was issued.
- 1951...** Assets passed the \$500 million mark and number of Federal credit unions exceeded 5,000.
- 1952...** Congress authorized a graduated scale of supervision fees that became very important in achieving self-financing status for Federal Credit Union System.
- Surety Bond 576 was developed cooperatively by Bureau of Federal Credit Unions, CUNA, and insurance carrier. Bureau assigned Form Number 576 to this bond.
- Federal Credit Union Act was extended to include Virgin Islands and the first charter issued in that area.

- 1953...** J. Deane Gannon was appointed Bureau Director as Claude R. Orchard retired after 19 years in directing the program.
- Bureau of the Budget requested Bureau of Federal Credit Unions to assume responsibility for assembling annual statistics for State chartered credit unions. Bureau Labor Statistics Department of Labor had performed this task previously.
- Membership of Federal credit unions passed 3 million and number of Federal credit unions exceeded 6,000.
- Federal credit union program became fully self-financing on July 1, 1953. Congress authorized a 10 year working capital loan of \$250,000 to help achieve this transition. Bureau of Federal Credit Unions repaid this loan in 5 years with interest.
- 1954...** In this 20th anniversary year assets of Federal credit unions reached \$1 billion, membership 3½ million, and number of Federal credit unions reached over 7 thousand.
- 1955...** Significant in achieving a self-financing program was the establishment of a graduated scale of examination fees, combining cost factors and ability to pay. This plan also provided for free examinations for the first year of a new Federal credit union.
- Membership passed 4 million and shareholdings exceeded \$1 billion for the first time.
- 1956...** Federal credit unions passed 8,000 in number and loans exceeded \$1 billion for the first time.
- 1958...** Number of operating Federal credit unions passed 9,000, assets reached \$2 billion, and membership exceeded 5 million.
- 1959...** The 25th anniversary was celebrated by inviting distinguished persons to advise Bureau of Federal Credit Unions on future goals.
- Congress recodified the Federal Credit Union Act and made it a modern credit union law. The Act was extended to include U.S. possessions.
- 1960...** Membership passed 6 million and loans outstanding reached \$2 billion.
- 1961...** Number of Federal credit unions passed 10,000 and assets reached \$3 billion.
- Bureau of Federal Credit Unions *Bulletin*, a quarterly publication, was first issued in March 1961.
- 1962...** Membership reached 7 million and shareholdings topped \$3 billion.
- Rules and Regulations were revised to provide for a comprehensive annual audit by supervisory committees and quarterly audits of lesser scope. Only copy of annual audit report is submitted to Bureau of Federal Credit Unions.
- At the request of the Inter-American Development Bank two Bureau staff members, William Allen and Joseph Bellenghi, were assigned to assist in planning the credit union program in Peru.
- The first charter was issued in Guam.
- 1963...** Bureau of Federal Credit Unions added the Division of Statistical Research and Analysis and started an expanded research program.
- Thrift Honor Award program is inaugurated.
- Emergency Preparedness Guidelines* were issued to Federal credit unions and a nationwide records preservation service established for Federal credit unions in an underground facility.

1964... On 30th anniversary of program Federal credit unions had passed 11,000 in number, \$4½ billion in assets, \$4 billion in shares, and 8 million members. Increase in shares percentagewise exceeded any other national savings program.

President Lyndon B. Johnson congratulated Federal credit unions for their accomplishments in thrift and Bureau Director J. Deane Gannon was awarded a Presidential Citation for "Outstanding contribution to greater economy and improvement in Government operations."

Bureau of Federal Credit Unions assumed full responsibility for monthly sampling credit union statistics for Federal credit unions and State credit unions. This had previously been done by the Federal Reserve System. Bureau of Federal Credit Unions will provide Federal Reserve Board with future data on credit union trends for use in *Federal Reserve Bulletin*.

D.C. chartered credit unions converted to Federal charters as the District of Columbia Credit Unions Act was repealed.

**STATISTICAL TABLES**

TABLE	PAGE
1. Selected data on Federal credit union operations, by year, 1934-64 -----	62
2. Percentage distribution of Federal credit unions, by amount of assets, as of December 31, 1935-1964 -----	63
3. Assets of operating Federal credit unions (by State) -----	64
4. Liabilities and capital of operating Federal credit unions (by State) ----	65
5. Assets of operating Federal credit unions (by type of membership) -----	66
6. Liabilities and capital of operating Federal credit unions (by type of membership) -----	67
7. Gross and net income, and undivided earnings of operating Federal credit unions (by State) -----	68
8. Expenses of operating Federal credit unions (by State) -----	69
9. Gross and net income, and undivided earnings of operating Federal credit unions (by type of membership) -----	70
10. Expenses of operating Federal credit unions (by type of membership) ----	71
11. Actual and potential membership of operating Federal credit unions; dividends and interest refund paid (by State) -----	72
12. Actual and potential membership of operating Federal credit unions; dividends and interest refund paid (by type of membership) -----	73
13. Loans made in operating Federal credit unions during 1964, and cur- rent and delinquent loans outstanding as of December 31, 1964 (by State) -----	74
14. Loans made in operating Federal credit unions during 1964, and cur- rent and delinquent loans outstanding as of December 31, 1964 (by type of membership) -----	75
15. Loans made and loans charged off and recovered, in operating Federal credit unions, from date of organization through December 31, 1964 (by State) -----	76
16. Loans made and loans charged off and recovered, in operating Federal credit unions, from date of organization through December 31, 1964 (by type of membership) -----	77
17. Federal credit union charters issued, canceled, and outstanding (by State) -----	78
18. Federal credit union charters issued, canceled, and outstanding (by type of membership) -----	79
19. Selected ratios pertaining to Federal credit union operations (by State) --	80
20. Selected averages pertaining to Federal credit union operations (by State) -----	81
21. Selected ratios pertaining to Federal credit union operations (by type of membership) -----	82
22. Selected averages pertaining to Federal credit union operations (by type of membership) -----	83
23. Percentage distribution of total expenses of operating Federal credit unions (by State) -----	84
24. Percentage distribution of total expenses of operating Federal credit unions (by type of membership) -----	85
25. Federal credit union operations (by asset size) -----	86
26. Selected ratios and averages (by asset size) -----	87
27. Loans to members by credit unions, December 1955-December 1964 (Fed- eral and State-chartered) -----	88
28. Total savings in credit unions, December 1955-December 1964 (Federal and State-chartered) -----	90
29. Total assets of credit unions, December 1955-December 1964 (Federal and State-chartered) -----	92
30. Summary data for D.C.-chartered credit unions converted to Federal charters in 1964 -----	94

NOTE: Detail will not necessarily add to totals in tables showing rounded dollar amounts.

TABLE 1.—Selected data on Federal credit union operations, by year, 1934-64

Year	Number of charters							No. of members (thousands)	Total assets (millions)	Members' shares (millions)	Loans outstanding (millions)
	During year				Outstanding end of year						
	Issued	Canceled	Net change	Cancellation rate <sup>1</sup>	Total	Inactive	Operating				
1934 <sup>2</sup> ----	78	0	78	-----	78	39	39	3	( <sup>3</sup> )	( <sup>3</sup> )	( <sup>3</sup> )

TABLE 30.—Summary data for D.C.-chartered credit unions converted to Federal charters in 1964  
 [Dollar amounts in thousands]

Item	1964	1963
Number of credit unions-----	16	16
Membership: Actual-----	31,436	28,746
Potential-----	83,385	59,215
Total assets/Liabilities and capital-----	13,044	11,034
Loans outstanding Dec. 31:		
Delinquent: Number-----	892	1,054
Amount-----	278	327
Current: Number-----	17,356	16,725
Amount-----	9,767	8,317
Total loans: Number-----	18,248	17,779
Amount-----	10,045	8,644
Cash-----	922	851
U.S. Government obligations-----	177	97
Savings and loan shares-----	1,682	1,163
Loans to other credit unions-----	30	72
Federal agency securities-----	59	-----
All other assets-----	129	207
Notes payable-----	110	203
Accounts payable and all other liabilities-----	23	19
Shares-----	11,555	9,593
Regular reserve-----	714	636
Special reserve for delinquent loans-----	( <sup>1</sup> )	1
Other reserves <sup>2</sup> -----	98	98
Undivided earnings <sup>3</sup> -----	544	484
Total income-----	1,010	893
Interest on loans-----	935	834
Income from investments-----	73	55
Other income-----	2	4
Total expenses-----	434	373
Total salaries-----	248	206
Borrowers' insurance-----	51	43
Life savings insurance-----	26	24
League dues-----	10	9
Surety bond premiums-----	5	5
Examination and supervision fees-----	13	12
Interest on borrowed money-----	7	6
Educational expenses-----	12	8
Other expenses-----	62	60
Net income-----	576	520
Dividends paid or payable--		
June 30: Number paying-----	0	0
Amount-----	-----	-----
Dec. 31: Number paying-----	16	16
Amount-----	456	398
Interest refund--		
Dec. 31: Number paying-----	1	2
Amount-----	7	10
Loans made during year:		
Number-----	21,823	20,213
Amount-----	12,534	10,994
Loans from date of organization--		
Total loans made: Number-----	320,890	300,090
Amount-----	116,705	101,816
Loans charged off: Gross amount-----	453	399
Recoveries-----	247	237
Net amount-----	206	162

<sup>1</sup> Less than \$500.

<sup>2</sup> Reserve for contingencies and special reserve for losses.

<sup>3</sup> Before payment of yearend dividends.

NOTE: These credit unions were operating under the District of Columbia Credit Unions Act prior to August 1964. Data for 1963, therefore, are included with data for State-chartered credit unions, while data for 1964 are included with data for Federal credit unions for the District of Columbia.

## LIST OF BUREAU PUBLICATIONS

Each Federal credit union receives at least one copy of all Bureau publications. Additional copies of the publications listed below may be ordered from the Superintendent of Documents, Government Printing Office, Washington, D.C., 20402.
