---

Dear Secretary of the Board Poliquin,

The proposed changes to Part 723 of the Federal Credit Union Act is a step in the right direction that allows credit union professionals to manage their institution to maximize value to their respective members. While Member Business Lending does not represent a significant percentage of our credit union's balance sheet, we do fully support these type of "common sense" revisions that make credit union products and services readily available. Thanks to you and the entire NCUA board for taking this approach where you have the authority to lessen the regulatory burden that we face daily.

Best Regards,

Sincerely,

Steve Webb
