General Poliquin:

The cooperative model remains successful as history has proven over the years. American's credit unions are serving close to 40 million households with savings of nearly \$1 trillion. This proposed rule will serve to hinder the diversity of credit unions by placing all credit unions into more general categories. Each one is unique from the \$60 billion Navy FCU to any of the \$1-10 million "family" credit unions. This one-size fits all formula will reduce the diversity of credit unions activity and it just doesn't make good sense to do that .

Protect the true nature of America's credit unions by ending this rule so we can celebrate the charters that made this industry possible. Firefighters, Policemen, farmers, taxi drivers, railroad workers, military personnel and many more from the east to the west coast, from the south to the north all benefit from their credit unions. Help us protect all credit union members and their credit unions by saying no to this rule.
