Subject: NCUA Risk-Based Capital Proposal Comment
Date: Friday, April 24, 2015 7:34:27 PM

Mr. Poliquin,

History has shown that the cooperative of credit unions are a success.. The diverse nature of our charters has meant that despite little capital—except member good will and loyalty—the forefathers and current stakeholders of the industry have built the second largest financial system in America today, serving close to 40 million households with savings of nearly \$1 trillion. The proposed rule will serve to hinder that diversity by placing credit unions into more general categories. Protect the true nature of credit unions by ending this rule so we can celebrate the charters that made this industry possible, from the \$30 billion credit unions to any of the \$1-5 million “family” credit unions. From the farming communities of South Dakota serving family farms with loans to the taxi drivers from NYC to San Francisco. From the raw recruit in San Diego to the forward deployed military personnel From the auto worker in Detroit or the high tech communities of Silicon Valley. The NCUA and the credit union industry would both be served better if the formulas and risk weights within RBC were not given the force of law. Do not force my credit union to institute changes both potentially drastic and unwarranted in our balance sheet to meet these arbitrary weights.

Thank you for allowing comments.
