I'm writing about your proposed regulations concerning incentive based bonuses for Banksters. In my humble opinion if we can't put them in jail we can at least not reward them for poor behavior. I'm a mastodon I guess but I remember part of a Corporate Charter was a requirement to serve the Public Interest, whether this was simply by providing clean, honest commerce or whether the company engaged in active public improvement. We seem to have entered an era where the Profit is the only responsibility of Public Incorporation. More and more they utilize the commons to generate profit and pay nothing to maintain that same common. Here is your chance to enforce some good old-fashioned Morality and Corporate Responsibility without a down side. Thanks you.

"To succeed in life, you need two things: ignorance and confidence." - Mark Twain
